Copy of a communication from the Consulting Architect to Government to the

Principal College of Engineering Moscow

No. 2715, dated 13th December 1893

Sir

I have the honor to submit the following report on the progress made by the Engineer & Engineer Subordinate students attached to this Division for the current half year of 1893.

M. R. L. D. Vukobratovic a Rajar joined this Division in July last & was posted to the East Sub Division. He was put in charge of the new Station in the China Bazaar Road Black Town from the commencement of the work. He helped in its laying out, and supervised its construction throughout being told when things were done correctly or not. He had then a practical training in laying out, excavation, concrete mixing & laying, Brickwork in foundations and superstructures, tiled & terraced roofing, Wood work plastering flooring &c. &c. He saw how the labor employed

on the different descriptions of work was distributed on the different sub heads, and managed so as to produce the best results.

A measurement book was given to him, and he measured up the work as it was building, which measurements were checked from time to time and have become office records.

He helped a great deal in laying out the New Lava College. As this is not a rectangular building the sides were checked by calculations which will be found in separate sheets in his note book.

He also helped in laying out the main drain diversion and was pointed out the effect of sub soil percolations in the old existing drain.

His Conduct throughout was good. Private C. H. Bryant Engineer Subordinate student has during the current half year taken a survey of the School of Arts Premises and prepared plans and Estimates for two cottages for "Good Central Bureau" and has also assisted the Sub St. Officer West in his other works in all of which he has given satisfaction.

His Conduct during the past six months has been exceptionally good.

He was found diligent and
