Read—the following letter from the Inspector-General of Jails, dated 23rd November 1893, No. C. 1965:—

In forwarding, herewith, plans and estimates, duly countersigned, amounting to Rs. 870, for the construction of two solitary cells in the female ward of the Rajahmundry Central Jail, I have the honour to request, at the instance of the Superintending Engineer, I Circle, that the Public Works Department may be accorded the necessary sanction to carry out the work, which cannot be done by this department, and that the necessary allotment of funds may be made.

2. The estimate was called for by my predecessor before I took charge of the department. The provision of solitary cells for the execution of sentences of solitary confinement on female convicts or for the separate confinement of disorderly female prisoners is certainly necessary.

3. The Superintending Engineer remarks, and I agree with him, that the flap shutters for the ventilators at floor level should be of wood, not iron. The inside ridge of the upper ventilator should, also, be rounded off, so that it may not form a ledge on which prohibited articles can be concealed. The locking arrangement of the doors should be on the Bengal standard plan which is now being used in the new cells under construction at Salem, Bellary, &c.

Order—dated 13th December 1893, No. 2611, Judicial.

The plans and estimates are approved and will be transferred to the Public Works Department together with a copy of the Inspector-General's letter.
