14. Copper for casting	1000 lbs				

Required for the Serahi, Mandijawan and other Catcherries sanctioned to be built during the current year. The allotments for the works have to be spent during the current year; the stores were not indicated for in England, because every endeavour is being made to reduce the quantity of stores in stock in the division as ordered by Government and only such stores kept as are positively known to be required. If the materials are not purchased locally all the work of the Catcherries will be at a stand still and the grants will lapse.

The materials are not available at the P. W. Stores Marton. Material required for construction of stoff boat for Buckingham Canal. The Executive Engineer Buckingham Canal is without proper means of locomotion and the Superintendent Engineer urges the early completion of the boat in order to enable that officer to perform his duties efficiently. If the article is ordered by indent on India office there will be great delay. The article is not procurable from the Marton P. W. Stores.

Stores 1354. These are required for sheathing lock gates now in progress and which have to be paid during the ensuing dry season. No such material is available either in this division or P. W. Stores at Marton.

N.B. These articles are necessary under Para 1 Clause 2 of G. O. No. 1679 of 2-7-86

No 5628 Forwarded to the Superintending Engineer 2nd Circle with reference to his Memorandum No 2246 of 10 December 1892.
