GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Account.

Read—the following paper :—

From L. L. WICKHAM, Esq., General Superintendent, Public Works Stores, Madras, to the Superintending Engineer, V Circle, dated 14th March 1893, No. 119 S.

I have the honour to forward, herewith, the copy of the letter received from the Collector and President, District Board, Nellore, and to request orders thereon as to the disposal of the famine tools therein referred to.

The following tools were issued to the Collector of Nellore in June last :—

Crowbars, 14 lb.	1,200
" of sizes	300
Hammers, stone, 4 lb.	3,000
Handles for "	3,000
Mamooties, 6 lb.	1,000

Enclosure.

From G. E. L. CAMPBELL, Esq., Acting Collector and President, District Board, Nellore, to the General Superintendent, Public Works Stores, Madras, dated 3rd March 1893, No. 525-Sub.

I have the honour to request you will be so good as to state if the tools lent by you for the famine relief works in this district can be returned to your stores, and, if not, how you wish them to be disposed of.

No. 111 W.

Submitted to the Chief Engineer, Public Works Department, for favour of orders.

2. The tools were despatched from the Public Works Stores to the District Board, Nellore, with reference to Chief Engineer's Memorandum No. 2909 C., dated 8th June 1892.

(Signed) J. HANNAN,
Superintending Engineer, V Circle.

20th March 1893.

Order—dated 6th April 1893, No. 902 W., Public Works.

The tools will be taken into store at Nellore by the Executive Engineer, Nellore Division, and will be added to the stock of famine tools of the II Circle pending a general redistribution regarding which separate orders are about to issue.

Famine Tools

Directing that the — returned by the District Board, Nellore, be taken into store at Nellore by the Executive Engineer and that they be added to the stock of famine tools of the II Circle pending orders regarding the general redistribution of the tools in the Presidency.

29th August 1892, No. 2400 W., Public Works.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Account.

Read—the following papers :—

From L. L. WICKHAM, Esq., General Superintendent, Public Works Stores, to the Superintending Engineer, V Circle, dated Madras, 22nd June 1892, No. 11 S.

I have the honour to report that I find that, when stores which are not in stock but are on the surplus lists of other divisions are urgently required, they, as a rule, have to be transferred to Madras, and, when they arrive, have to be repaired in the workshop.

2. It is very often impossible to tell what any particular store is from the nomenclatures given and there are differences of opinion as to whether they are in good order or not.

3. I, therefore, would suggest that all surplus stores in division should be returned to this store for deposit except certain stores which are not worth the carriage.

4. Old carpenters' and smiths' tools can be utilized in the workshop and in various other ways the surplus stores could be utilized; all stores would then be repaired and be made serviceable.

No. 297 W.

Forwarded to the Chief Engineer, Public Works Department.

2. I consider it will be of advantage if the General Superintendent's suggestion were given effect to. Under the existing rule, Code para. 1672 note, only tools and plant, charged to a particular work, may, when no longer required, be sent to the Public Works Stores, but tools and plant charged to the head "General" have to be retained in the divisions, Code para. 1721-B.

(Signed) D. McN. CAMPBELL, Lt.-Col., R.E.,
Superintending Engineer, V Circle.

29th June 1892.

Office-note from the Examiner, Public Works Accounts, dated 15th August 1892, No. 101 A.

The accumulation of stores that are really surplus is undesirable and the cost of carriage from all parts of the Presidency to Madras would unnecessarily add to their value.

2. The responsibility for declaring stores as surplus should, in my opinion, rest with the Superintending Engineer and this selection may be made, as far as stock is concerned, when the annual list prescribed in Government of India Code, volume I, chapter X, para. 101, is sent to him for orders (see also para. 102). I would, however,

strongly recommend the procedure and rules laid down in Government of India Code, volume IV, chapter V, paras. 25 to 28 and 30, for disposal of surplus stores on State Railways being adopted in regard to all surplus articles, stock as well as tools and plant. It is preferable to sell such stores at a loss to-day than allow them to deteriorate still further and incur further charges on their storage.

Note by the Chief Engineer, Public Works Department.

I entirely concur in the last sentence of the Examiner's note.

22nd August 1892. (Signed) J. PENNYCUICK, Colonel, R.E.,
Chief Engineer, P.W.D.

ORDER—dated 29th August 1892, No. 2400 W., Public Works.

The Government approves the suggestions in the Examiner's note above recorded. The rules in paras.* 25 to 28 and 30, chapter V, volume IV, Government of India Code, will accordingly be adopted, *mutatis mutandis*, in dealing with surplus articles of stock and tools and plant in this Presidency.

* Printed as an appendix to this order.

G.O., 29th Aug. 1892, No. 2400 W.

AUGUST.

Surplus Articles of Stock and Tools and Plant

Laying down rules for adoption in dealing with — in this Presidency.

902/4

Appendix to G.O., No. 2400 W., dated 29th August 1892.

In order to keep the stock of stores in divisions as low as possible, all stores, which have lain in a depôt for two years without any requisition having been made for any part of them, or for the use of which there is no reasonable prospect within two years, must be shown as "surplus" and lists of such stores must be drawn up half-yearly in the balance return (form attached) for submission to the Superintending Engineer of the Circle. In fixing the value of surplus stores that have never been issued, a rate of discount, for long storage or depreciation must be allowed at 5 per cent. per annum and the column in the surplus stores list headed "Fair market rate proposed to be charged in transfer" should be filled in with prices arrived at on this basis, *i.e.*, the fair market rate will represent the present market rates for similar stores when new, less a discount of 5 per cent. per annum, such discount being limited to 50 per cent. of present market rate. When this point is reached, the stores should be at once sold by auction to highest bidder, but it should be remembered that in a well-managed division serious accumulations of surplus stores should never occur.

In the case of stores which have been used in any way, the prices will be determined upon a similar basis. In this case, the discount for deterioration will be fixed at 10 per cent. per annum upon the value assigned to the articles at the time of their being returned into store with no minimum transfer value.

In all cases the transferring division will deliver the surplus stores free at the nearest railway station of the purchasing division.

It should be clearly understood that the term "surplus stores" does not mean worthless stores. Worthless stores should be treated as scrap and sold to the best advantage. The surplus stores list should contain only articles which are in serviceable order, but which a careful scrutiny of the stores balances shows to be in excess of the next two years' requirements of the line upon which they have accumulated.

When surplus stores are sold by auction, the articles will be shown in the issue returns and ledger at the *selling* value and the consequent loss will be written off under the orders of the Superintending Engineer. All unserviceable stores sold to the public should be indelibly marked. Some distinctive mark should be used for the stores sold during each year and a register of such marks should be kept up. The distinctive marks adopted should be such as would not be easily effaced or forged. Stores which require to be softened for marking, such as files, can be marked in the Public Works shops.
