TECHNICAL NOTE.

9.7.93

Name of work Constructing three Stationary Sub Magistrates offices in the South Arcot District

The accompanying estimates have been framed with reference to G.O. No. 2708 W dated 29th Sept 1892 to provide for constructing Stationary Sub Magistrates offices at Tindivanam, Tirukoilur & Kallakurichi in the South Arcot District.

The amount of the estimates is as follows:-

(a) Stationary Sub Magistrates offices at Tindivanam — Rs 5950
(b) — do — Tirukoilur — " 5870
(c) — do — Kallakurichi " 5830

The design adopted for these offices is that provided in the type design for Taluq offices approved in G.O. No. 3023 W dated 11th November 189[illegible] except that the two small side rooms have been made 11 feet instead of 9½ feet with a view to symmetry.

No compensation for land is provided in the estimates as the proposed buildings are to be constructed in the compound of the Taluq Offices at the stations mentioned vide site plans submitted.

Particulars of Construction:

The nature of soil at the sites of the several Offices & the depth of foundations proposed are as follows.

Office at Tindivanam. The surface soil is stated to be earth to a depth of 2' 9" & the sub soil red earth & gravel to a depth of 1' 9" below the above & then hard gravel. The foundations are proposed to be carried down 5 feet deep the lower 2 feet to be laid with concrete & the upper 3 feet built of brick in chunam.

Office at Tirukoilur. The surface soil is gravelly & the sub soil very hard mixed with moorumbu. The foundations are to be sunk 4 feet deep the lower 18 inches to be laid with concrete & the upper 2½ feet built of brick in chunam.

Office at Kallakurichi. The surface soil is gravelly & the sub soil stony, stones being met at 2 feet in depth, the foundations are to be sunk 3' 6" deep the lower one foot to be laid with concrete & the upper 2½ feet built of brick in chunam.

The basement of all the offices is to be raised 2 feet high & the superstructure walls raised to the heights noted on the plans & built with brick in chunam with archwork over doors & windows. The walls are to be plastered with 2 coats of chunam except the interior faces which will be pointed. The flooring is to be of 3" cement concrete laid over 6 inches of ordinary concrete & the surface plastered over with cement. The roof is to be of Mangalore tiles laid over teak reapers & rafters supported on purlins & trusses & ceiled with ½" teak planks. The doors & windows are to be of the description noted in the estimate of teakwood & painted with 3 coats of Silicate chocolate paint.

The scantlings of roof timbers are correct.

It is stated that the rates allowed are the same as allowed for the Taluq Offices constructed at the same places — they may therefore be passed.

The following rates are in excess of the Divisional schedule but the Supdg. Engineer V Circle states that they are the same as those allowed for the new Taluq Office lately completed.

	Tindivanam	Tirukoilur
Concrete	13-10-0 against 13-0-0	— " —
Brick in chunam	16-7-0 17-8-0 } do. 15-0-0	— " —
Table moulded brickwork	26-13-0 do. 18-12-0	— " —
Teak wood work	— " —	4-7-0 — 4-0-0
Panel & venetian doors		1-8-0 — 1-6-0
wood ceiling		2-3-0 — 2-0-0

By applying schedule rates the saving will be Rs 145 for Tindivanam & Rs 190 for Tirukoilur.

The plinth area of the proposed buildings is 1955 sq ft & the cost per sq ft will be as follows:

Tindivanam Office Rs 3-0-8
Tirukoilur -do- 3-0-0
Kallakurichi -do- 2-15-8.

The plans & estimates have not been countersigned by the Collector. They are however approved of in the Rev. Dept.
