Sir,

Enclosures.

With reference to G. O. No. 762 W
of 17th March 94 and para 18 Examiner's
report on Bellary Office, I have the
honor to state finding, that prior to
August 93 one General balanced Return
of Tools was kept for the whole division
the first Column of which contains
the great bulk of the tools in charge
of the Storekeeper.

2. The totals appear to have been
obtained by adding to the tools in
store the verified totals of each of
the Subdivisional tool returns,
and not by a method of deductions.

3. Since the above date, the Storekeeper
sends in a Subdivisional Return
Separately.

Separately like the rest.

4 There are some scorings out
and transfers due to revised
nomenclature of some of the tools

5. The ordinary tools were all
gone over by Mr. Executive Engineer
Russell in 1890, and the present
Executive Engineer proposes to do the
same as soon as his district tour
will allow.

6. The Division has had a very
large accession of tools during
the late famine, but these are
accounted for in a distinct set
of returns from the ordinary stores
of the Division, and have been
stacked at great expense in such
a manner as to allow of ready
verification.

I have the honor to be
Sir
Your most obedient

To E.W.

The return of tools and plant of the division, for the half year ended February 1894, shows that verification of articles has been made by Sub-divisional officers and the Storekeeper at Bellary. And if the Sub-divisional returns are correctly kept up now the irregularity noticed in the past will be removed.
