Ex. P. L. [unclear]

Chief Engineer, P. W. Department
for favor of very early orders. As
pointed out, the stone will merely
be transferred from the "Stock" of
the Istma Southern D., to that of
the Istma Eastern D., but relief
will be given to the quarries and
the collection of materials in
the Istma Eastern D. will not be
delayed.

Executive Engineer, Kistna
to the Superintending
Engineer, II Circle, dated 4th July 1894, No. 1632.

In continuation of my letter No. 1199 dated 31st May 1894 asking for further allotments under Capital and with reference to your No. 702 K.S. dated 29th June 1894 in which Government, having recognized the necessity, have wired to Government of India, I have the honour to bring to your notice that my indents on Mogalrazpuram quarries will be practically completed in a week or ten days time, and unless I have further allotments I can send no more indents, and punts and quarries will have no work.

Considerable quantity of materials require to be collected before next working season and it is very advisable to commence conveying the materials at once.

In addition to this, there is an accumulation of rough stone in the Quarry which it is advisable to clear out so as to vacate the space.

This stone is now under stock in the Northern division and as it appears to me a matter of no importance to Government to which division it belongs, I have the honour to suggest that I be allowed to convey the stone to the site of the sanctioned works which are to be built next working season, keeping it under stock and charging it off to the works as soon as the extra allotments are granted.

Executive Engineer, Kistna
to the Superintending
Engineer, II Circle, dated 4th July 1894, No. 1632.

In continuation of my letter No. 1199 dated 31st May 1894 asking for further allotments under Capital and with reference to your No. 702 K.S. dated 29th June 1894 in which Government, having recognized the necessity, have wired to Government of India, I have the honour to bring to your notice that my indents on Mogalrazpuram quarries will be practically completed in a week or ten days time, and unless I have further allotments, I can send no more indents, and punts and quarries will have no work.

2. A very considerable quantity of materials require to be collected before next working season, and it is very advisable to commence conveying the materials at once.

3. In addition to this, there is a very large accumulation of rough stone in the Quarry which it is advisable to clear out so as to vacate the space.

4. This stone is now under stock in the Northern division and as it appears to me a matter of no importance to Government to which division it belongs, I have the honour to suggest that I be allowed to convey the stone to the site of the sanctioned works which are to be built next working season, keeping it under stock and charging it off to the works as soon as the extra allotments are granted.

General Account.

READ—the following paper:—

From the Executive Engineer, Kistna Eastern Division, to the Superintending Engineer, II Circle, dated 4th July 1894, No. 1632.

In continuation of my letter No. 1199, dated 31st May 1894, asking for further allotments under Capital, and with reference to your No. 702 K.S., dated 29th June 1894, in which Government, having recognized the necessity, have wired to Government of India, I have the honour to bring to your notice that my indents on Mogalrazpuram quarries will be practically completed in a week or ten days' time, and, unless I have further allotments, I can send no more indents, and punts and quarries will have no work.

2. A very considerable quantity of materials require to be collected before next working season, and it is very advisable to commence conveying the materials at once.

3. In addition to this, there is a very large accumulation of rough stone in the quarry which it is advisable, in the interest of the quarry, to clear out so as to vacate the space.

4. This stone is now under stock in the Northern division, and as it appears to me a matter of no importance to Government to which division it belongs, I have the honour to suggest that I be allowed to convey the stone to the site of the sanctioned works which are to be built next working season, keeping it under stock and charging it off to the works as soon as the extra allotments are granted.

5. Even if extra allotments are not granted for the current year, the stone can be charged off in April 1895 against next year's grant.

6. In any case, it seems inadvisable to allow the punts to lie idle when the manufactured stone is waiting to be conveyed and ought to be conveyed both in the interests of the works and the quarries.

7. For the above purpose all that appears to be necessary is that the reserve stock limit for the division be temporarily raised from Rs. 3,000 (the amount sanctioned) for late Gudivada division to Rs. 20,000.

8. I have to request very early orders in order that the work of the punts may not be interrupted.

No. 779 K.S.

Forwarded to the Chief Engineer, Public Works Department, for favour of very early orders. As pointed out the stone will merely be transferred from the "stock" of the Kistna Northern division to that of the Kistna Eastern division, but relief will be given to the quarries and the collection of materials in the Kistna Eastern division will not be delayed.

6th July 1894.
