Nature of the Executive Engineer's letter. The Executive Engineer's explanation as to why no progress reports for the work were submitted up to the end of the last official year, should be obtained and submitted.

2. As the work seems to be approaching completion, it is too late now for a revised estimate to be sanctioned. A completion report should, therefore, be submitted, showing the excess outlay requiring sanction, with full explanation for such excess.

Allo for the new Suspension bridge across the Mullar river on the Mettur-palayam Coonoor road.

No. 1905 W. d. 1st August 1894

Revenue No. 1905 W. d. 7. 11. 94

Note: The expenditure in the current year already audited is Rs. 8277 and the Executive Engineer's report that the amount has still to be made for work done. The allotment required to complete the work being only Rs. 10,700, the amount shown in the estimate appears to be correct.

The expenditure to the end of 1893-94 was Rs. 44,502 & the amount asked for is Rs. 10,700 - total Rs. 55,202. I agree the estimate of Rs. 42,500.
