dressed two feet above the present reduced level of water in the lake. Another acre has also been reclaimed but has not been top dressed. Apart from this, it is estimated that about 2 acres have been silted up under water level.

3. The Municipal Engineer has prepared a rough estimate (enclosed) amounting to Rs. 9,000 for top dressing and reclamation of five acres, including a rough stone culvert for conveying the drainage from the eastern slopes of Elk Hill into the main stream which enters the lake. The council doubts whether in the present condition of Imperial and provincial funds the Government would desire to continue the reclamation scheme to the extent estimated for. The council is however of opinion that if funds are available a small sum of money might be allotted for dredging the main stream and conveying the silt now deposited in its bed into the lake.

4. The lake level having been lowered last year by one foot below the level deemed suitable, the council is not in favor of the suggestion in para. 11 of the report to further lower the level by three feet.

Order dated 31st July 1894, No. 1005 M. M.

An additional allotment of Rs. 1000 for the purpose

purpose of dredging the main stream will be sanctioned in the Financial Department.

port of the Municipal Engineer No. 35 dated the 1st June
Instant, with a skeleton map, showing the work done up
to the 6th April in connection with the Lake reclamation.
The report was circulated among the members of the munici-
pal council and at the meeting held on the 21st June
Instant, the following resolution was passed.—

"The report will be submitted to the Govern-
ment for information."

2. The amount sanctioned by the Government
from provincial funds for the reclamation was Rs. 3000. The
expenditure incurred amounted to Rs. 2994. For the money
spent about an acre of land has been reclaimed and top-

dressed
