2. When the establishment for investigating the Kistna upland projects was abolished under G.O. 2nd 2438 W dated 22nd September 1893, the Executive Engineer Kistna Western Division retained the services of two surveyors on Rs 80 per mensem each in anticipation of sanction to an increase to the strength of the T. R. Party for preparing plans and estimates for private tanks affecting Railways. One of the Surveyors entered upon this work on the 1st and the other on the 9th December last and the services of both were dispensed with from 1st February 1894. Estimates for some of the tanks were prepared and sent to the Collector for disposal. The pay of the Surveyors can be debitable to the Tank Restoration Scheme. As the Examiner of P. W. Accounts has disallowed their pay it is requested that he may be authorized to pass the outlay.

3. The action of the Superintending Engineer in increasing the strength of a Tank Restoration Party without sanction was most irregular.

Engineer,

NOTES.

REFERENCE TO MADRAS P. W. D. CODE,
EDITION OF 1886.

PARAS. 25 & 26.

1. The column headed "present scale" should invariably show the *sanctioned scale for the time being* and not the strength of the actual (whether above or below sanctioned) establishment as it happens to stand at the time. The "present scale" should be verified by the examiner before the proposal is submitted to government for sanction (paras. 25 and 26).

2. In the column "average or fixed pay," financial value, not mean value, should be given.

3. The financial value should in the case of progressive appointments be calculated as follows:—

(1) If the period of rise from minimum to maximum is 5 years, the average will be the minimum *plus* two-thirds, or if the appointment is a ministerial one, *plus* three-fourths, of the difference between the minimum and maximum (C. S. R., Art. 164).

(2) If the period of growth exceeds five years (as in the case of accountants) the $\frac{3}{4}$th fraction should be decreased by $\frac{1}{60}$th of the difference for every year by which the period exceeds five; the fraction for periods in excess of five years will therefore be as follows:—

$$6 \text{ years} = \tfrac{3}{4} - \tfrac{1}{60} = \tfrac{44}{60}$$
$$7 \text{ years} = \tfrac{3}{4} - \tfrac{2}{60} = \tfrac{43}{60}$$
$$8 \text{ years} = \tfrac{3}{4} - \tfrac{3}{60} = \tfrac{42}{60}$$

and so on; so that when the period of growth is 20 years the financial value will be the exact mean.
