Engineer, South Arcot Division

To the Superintending Engineer 5th Circle

Sir,

In returning herewith your Endorsement, 402 S.A. of the 6th Instant, I have the honor to refer Maistry Veerasami Naidu of the Poleroon Bank (4th section) as trustee of some temple charity, purchased 3½ acres of land near the middle of the 32nd mile of the Flood Bank in January 1893. This I was made aware of at the time; but did not object, as the maistry would not derive benefit from the produce of the land.

2 On receipt of your Endorsement however I resolved to make a full inquiry into the matter, and as a result find that although the maistry derives no personal benefit from the lands, still as trustee he is interested in the produce which I think is objectionable. I have therefore ordered his transfer to the upper section of the Flood Bank (i.e. from 15th mile upwards) so that he will be far enough from the 32nd mile.

3 The sluice in the River Bank which irrigates the land in question, as well as other adjacent lands, is a very old one of many years standing, and not of recent origin as stated in the petition. Also the statement that the maistry is about to purchase other lands in Thirukali = palai is entirely false.

 We may here safely mention that the land is within the Coleroon embankment a padugai land and was not cultivated till then. The S. P. W. refused to give the former owners any channel on the plea that it would be highly dangerous if that embankment is cut especially at such a dangerous place.

But the very next day the said Maistry bought the land the embankment in the 32 mile is cut across and a little sluice is provided for his lands. we do not know where that danger has gone now nor do we know whether he has the permission of his superiors to do such acts.

Again the very same majority recommended the closing of all other sluices on the very same Colorado embankment on the plea that it would be highly dangerous to have them open in flood times. ~~has~~

Further the same Maistry is trying to acquire lands in Thirukkallipalai a village within his jurisdiction.

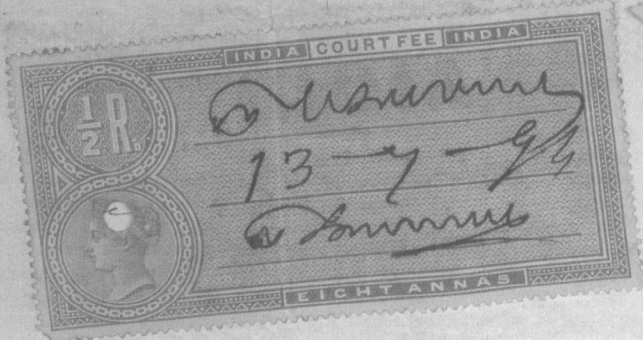

we your humble mahazardars respectfully beg your Excellency's indulgence to consider whether it is just to close these long-standing and ancient sluices through which we could not expect greater damage and to cut open the embankment for the sake of irrigating the 2 or 3 acres of Maistry ⁱⁿ veresany soidu in one of the most dangerous parts

Most Respectfully sheweth.
your mahazardars respectfully beg to bring
the following few lines for your excellency's kind
consideration.

The above said villages are irrigated
by Gouerpett channel a branch of Khan Sahib
Canal. The river Coleroon borders those villages.
A Maistry named Mr. Veerasamy saidu is appointed
as the Maistry of the D. P. W. to superintend
the Coleroon embankment as well as the
Gouerpett channel. He has been doing his work
as such for the last 5 or 6 years and he is not
neither known surveyor or draughtsman nor is he a
passed candidate. Anyhow he got into the
good graces of his superiors and has risen to
such a place. It is not our duty to express
so far as he does his duty as a maistry just
and correctly.

But his actions as a Government
official compell us to put forward before the
Government his actions which cannot be
of irrigating the 2 or 3 villages of Mr. Veerasamy
saidu in one of the most dangerous parts
of
