From A.A.G. Malet Esqre Executive Engineer, Krishna Western Division to the Superintending Engineer 2nd Circle, dy 22nd December 93, No. 5715.

In reply to your No. 444 Gl. dy 27th November 1893 I have the honor to explain the delay in submitting the statement showing the dates on which land was taken possession of as follows-

The Examiner in his note printed with G. O. No. 2892 W dy 11th November 93 evidently is of opinion that the "latitude" allowed removed all difficulties. In this he was incorrect as his premise stated in para 2 of his note, viz, that all the Executive Engineers had to do was to ascertain the months in which the first outlay was incurred on the work concerned, is wrong.

Many of the works in this division has been in progress for several years and land &c in connection with them has been acquired as the works progressed.

For example - one of the items in my statement is "Widening Main Canal in Tadepalli" - a amount Rs 38/- When the statement was first prepared in my office and sent to me for approval I found the following annotation

Date of award & statement 1-9-91
Date of transfer of land - September 1881 being the year in which expenditure on widening the main Canal was first incurred.

I remembered that this piece of land had been taken up by me, so, I had the records searched and I found that the work at that spot was Commenced in February 1892. The date of transfer of land had to be altered from Septr 1881 to February 1892.

Many of the other items were of a similar nature and in each case the records had to be searched & enquiries made, and this necessarily took a good deal of time.
