Scantlings are correct

Rates are fair.

The plinth area of the main building is 715 square feet, and the cost per square foot will be Rs. 4-15-5. for a double storied building

The plan~~s~~ and estimate~~s~~ have been countersigned by the Collector of the District and approved in the Revenue Dept. Department.

REMARKS.

This building has been framed with reference to G.O. No. 791 W dated 20th March 1894 & provides for constructing a new building on the site of the existing Sea Customs house at Kallai, (near Mahé) in the Malabar Dist.

The existing building which is reported to be in a unsafe condition & beyond repairs is to be demolished.

The building is to be two storied & the accommodation proposed is as follows:-

Basement floor. Treasury 12'0" x 12'0", Record room 12'0" x 6'0" with front & side verandahs 6 feet interior width & fitted with a wooden stair-case in side verandah, as per plan.

First floor is to consist of an office room 19'6" x 12'0" raised over the treasury & record rooms, with front & side verandahs.

A basement of 4 feet in height has been allowed in order to keep the floor well above the high floods in the river as the site of the building is in low position.

Provision has been made in the estimate for revetting the bank of the backwater in front of the proposed building for a length of 50 feet & for demolishing the existing building, clearing site & forming roadway.

The treasury & record room appear to be badly lighted for the want of windows. It is thought that an iron barred window 4' x 5' with double shutters, interior glazed & exterior panelled may be provided to each room.

The foundations are proposed to be laid partly of concrete & partly of laterite & as the soil is reported to be sandy, a concrete foundation may be provided throughout to ground level, by which the amount of the estimate will be increased by Rs 6 only thus:-

Concrete foundations now proposed.

steps: 695 cft at Rs 14 — 97
Laterite in chunam
