READ—the following papers :—

Office-note from the Chief Engineer for Irrigation, dated 7th November 1894, No. 290.

Read—Office-note from the Secretary to Government, Public Works Department, dated 20th June 1894, No. 404 D.

Read—G.O., Revenue Department, dated 9th July 1894, No. 2660.

As it is highly desirable that the subject of the proper regulation of supply between the branches of the Cauvery and Vennár should receive early attention in the face of the enhanced assessment it is proposed to levy on the ryots of the Tanjore district, it is to be hoped that an Assistant Engineer will shortly be placed with the necessary staff under the orders of the Superintending Engineer to carry out this necessary investigation. The general scheme for the regulation is foreshadowed in the report of Captain (now retired Colonel) Mead, R.E., in 1866 when placed on special duty, and many of the main regulators have been constructed down to the Veerasholanar and Tirumalarajanar on the Cauvery and the Pandaviyar and Vellayar on the Vennár systems. Continuing the broad lines for guidance laid down in Captain Mead's report, the smaller branches of these main rivers should now be attended to, the simpler and more economical method of stepped dams instead of vented dams being adopted. After the supply has been equitably proportioned between these branches, the improvement of the sluices in the delta commencing from the Cauvery-Vennár regulator may be taken up until the whole delta has received attention in this respect.

From J. C. LARMINIE, Esq., Superintending Engineer, V Circle, to the Chief Engineer for Irrigation, dated Chepâk, 6th December 1894, No. 452 E.I.

With reference to your memorandum No. V/94 T.J., dated 26th November 1894, I have the honour to forward proposition statements showing the special survey establishment required for making investigations in view to the proper regulation of supply of water between the branches of the Cauvery and Vennár in Cauvery delta, and to state that this establishment is proposed in supersession of that sanction for which was applied for in this office No. 423 E.I., dated 16th November 1894.

2. I consider that it will be better to employ the establishment during the six months, July to December, as irrigation requirements can be better seen and understood while it is actually in progress. A list of the works to be designed and estimated for was forwarded with this office No. 276 E.I. of 19th July 1894.

No. 66 E.W.

Forwarded to the Chief Engineer and the Secretary to Government, Public Works Department, for favour of sanction.

CHEPÂK,
13th December 1894.

(Signed) F. W. ASHPITEL,
for Chief Engineer for Irrigation.

ORDER—dated 22nd December 1894, No. 3292 W., Public Works.

The employment for a period of six months, from July to December 1895, of the undermentioned temporary establishment required to work out the completion estimates of the Cauvery delta system, is sanctioned :—

	Per mensem. RS.
One surveyor on	60
Ten lascars on	7 each
One draftsman on	70
One clerk on	30

2. An Assistant Engineer will be posted to the charge of the survey party in due course.

3. This sanction has been registered as Provincial No. 55 W. of 1894–95 and classified as Establishment, Temporary.
