Resolution

N.B. Comd to P.W. Dept.

With reference to Government Orders dated 3rd March 1891 Mis: No: 1437 and 6. April 1891, Mis: No: 2171 Revenue Department, the Board begs to report to Government that during the year 1893, no steam boats, launches or other vessels of Government were constructed by private firms for any Department under the Board's Control.

2. In the return received from Tinnevelly the Collector notes that two vessels were constructed during the year at the Government Dockyard, Calcutta. He will be informed that this information was not required and that the return should show only cases where the Construction of Government vessels were entrusted to private firms in preference to Government Workshops. Vide para 4 of the Government of India Resolution Communicated in Boards Proceedings 22. April 1891, No: 256.

Note

The Board have already sent in a "nil" return - vide Rev. Dept Endt: No 68 d/11 Dec 93 read with G.O. 189 W d/20 Jany 94.

Copy of letter from the District Judge, South Canara, dated 24th December 1893, No. 118. to the Registrar, High Court, Appellate Side, Madras.

I have the honour to inform you that I inspected the Munsif's Court at Puttur on the 21st instant. I found among other things that the roof leaks in many places especially at the gutters and in the verandas. The Munsif tells me that he thinks the leaking at the gutters is due to the use of zinc instead of copper to from the channel for the water to flow down, and he says that zinc will not stand the rain of the monsoon of this District for more than 3 or 4 years. How far this is so, I do not myself know, but the Tahsildar of the corroborates the Munsif's statement and says that in private houses zinc gutters have to be renewed every few years and that the zinc requires frequent patching. It is most important that the leaking should be stopped as if it is not, in the course of a few years the wood work of the roof will require to be renewed. The building is so constructed that the water from the upper roof has a long ~~deep~~ drip of 6 feet or more to the roof of the verandah, and I think this partly accounts for the leaking in the verandas.

To the Accountant-General, with Register. & L.P.C.
" Examiner, P.W. Accts.
" " Public Works Department.

the Sanction of Government may be [illegible] for having the necessary repairs to the Puttur Court-house estimated for and carried out by the Public Works Department.

2. The ceiling is of bamboo matting and I do not think things will be ever satisfactory until the bamboo matting is replaced by wood planking. This would be expensive, and I would hesitate to recommend wood-planking under the present tiles which are of an inferior pattern. As I said in my letter No. 111 of 9th instant about the Kundapur Court, I think it is a question whether the present tiles should not be at once replaced by tiles of the new pattern for I doubt if with the present tiles the roof will ever be made water tight and I think it is a question whether it would not be cheaper in the long run to put the roof in a thorough state of repair at once. I think it would be advisable to have piping all round the upper roof so as to prevent the water dripping into the lower roof. All these matters are for the decision of the officer of the D. P. W.

3. I may mention that the tower of the Court was struck by lightning some time ago, and some temporary repairs have been done to it by the D. P. W, but probably

Read—again—

Government of India, Public Works Department, Circular No. 69 P. W., dated 20th September 1879.

Government of India, Public Works Department, Resolution No. 292 M., dated the 30th July 1889.

Resolution.—In supersession of previous orders on the subject the Governor-General in Council is pleased to approve of the following modified rules on the subject of the construction and repair of steam-boats, launches and other vessels for the use of Government by the Government dockyards at Calcutta or Bombay and by private firms.

2. In future, work which is connected with the construction of Government vessels must, in all cases, be carried out either by Government workshops or by the Government dockyards, unless for any special reason it appears that the employment of private firms will be more economical, or if workshops or dockyards are unable, by press of other demands, to execute the work as speedily as is necessary.

3. Local Governments and Administrations are at liberty in every case to call for estimates for any work, which has to be done, both from Government dockyards and private firms simultaneously, and to decide, with reference both to the amount of the tenders received and to other considerations, how the work shall be executed.

4. An annual return is to be submitted on the 31st December of each year to the Government of India showing all cases in which work, of the nature referred to, has been given to private firms in preference to Government workshops or dockyards, with a full explanation of the reasons which led to the employment of the private firms.

5. As regards repairs to Government vessels, local Governments and Administrations, except those of Bengal and Bombay, where Government dockyards exist, will probably find it to their advantage to have such repairs as may be required executed locally, and the return prescribed in the preceding paragraph need not therefore, in their case, specify repair work executed by private firms. In the case of the returns from Bengal and Bombay, the returns should, however, specify such repairs which should be executed, whenever possible, at the Government dockyards.
