13TH MARCH 1894, No. 711 W., PUBLIC WORKS.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following papers:—

No. 6 E.W.

Note by the Chief Engineer for Irrigation, Tank Restoration Scheme.

The accompanying statement, showing the establishment required during 1894-95 in connection with Tank Restoration Scheme investigation, amounting to Rs. 44,572, is submitted to Government for sanction with effect from the 1st March 1894.

2. It will be noticed that the statement differs considerably in detail from that submitted last year, the strength of surveyors and draughtsmen being considerably increased and the clerical branch reduced in numbers.

3. In the head office the establishment is proposed to be reduced by one clerk and one tracer as, owing to the introduction of printed plans and estimates for sluices, these men are no longer required. On the whole, there is a saving, however, of Rs. 8 only, as various small increases of pay are proposed to be given.

(a) An increase of Rs. 20 per mensem is proposed to be given to the Manager. This increase is proposed because Mr. Beeby has done exceptionally good work and for some time past has had his work materially increased owing to the head clerk (No. 2 in the list) having reverted to his permanent place in the office of the Chief Engineer for Irrigation. It has been evident for some time past that the descriptive memoirs and plates which form one of the most important results of tank investigation were not receiving the attention due to them and were and are much in arrears. The head clerk's post was, therefore, not filled up and a passed Assistant Engineer was appointed in his place to work up the descriptive memoirs and plates. This man has now resigned for a permanent post in the Civil Engineering College and it is proposed in future to reserve it for a passed overseer or draughtsman. The result is that the Manager has now to do the work formerly done by the head clerk in addition to his previous duties, and the small increase of Rs. 20 is proposed to raise his pay to Rs. 200, which is not considered to be too much for the work he has to do.

(b) Instead of a head clerk drawing Rs. 100 per mensem, it is proposed to appoint a passed overseer or draughtsman on Rs. 80 per mensem to look after the descriptive memoirs and plates.

(c) An increase of Rs. 15 is proposed to be given to the head draughtsman who is an exceptionally good man and works well and hard. He ranks as a special draughtsman and as such would, if he were in a Superintending Engineer's office, be now drawing Rs. 130 per mensem. He holds certificates from numerous officers, all of which are of the most favorable character and is considered to be fully deserving of the small increase of pay now proposed.

(d) The other changes in the head office consist of the abolition of one clerk and one tracer, whose services are no longer required, and certain small increments to bring the pay of appointments to round numbers. The scale now proposed may be considered to be finally fixed so long as the present number of parties working directly under it are maintained and no further increase of pay should be given.

4. The scale of surveyors and draughtsmen in Nos. I and II Parties has been increased by one of each class and the number of clerks reduced. The experiment of increasing the number of surveyors and clerks in a party was tried when Nos. IV and V Parties were transferred to Pattakkóttai taluk with the most satisfactory results. These strong parties gave a very large outturn of work compared with the weaker Nos. I and II Parties, and it is proposed to increase the strength of other parties, so that, if possible, the same result may be obtained from them. The increased outturn from Nos. IV and V Parties was no doubt partly due to the energy of Supervisor W. Masilamony Mudaliar who has worked extremely well, but it was also largely due to the increase in the strength of surveyors who, before, were not sufficiently numerous to fully occupy the time of the overseer in charge.

5. The parties, with the exception of No. VIII, will, in future, be all of the same strength, viz. :—

1 Overseer.	3 Draughtsmen.
4 Surveyors.	2 Clerks.

No. VIII Party will, it is reported, complete the minor basins now in hand by end of June next when the party may be broken up.

6. Among the draughtsmen some increases of pay are proposed because great difficulty is experienced in keeping men. Directly a man has learnt his work he casts about for employment elsewhere where he can obtain better prospects, and therefore, in order to induce men to remain in the Tank Restoration Scheme, some slight increments are proposed.

7. The chief items of increase are in No. VII Party which up to date has been working in the Kistna district under the Superintending Engineer, II Circle. It is proposed, at the request of the Superintending Engineer, V Circle, backed by the Collector of Chingleput, to start this party in the Chingleput district under an upper subordinate, and it has accordingly been brought up to the strength of other parties working directly under the Chief Engineer for Irrigation.

8. A good deal of inconvenience has been caused by each party being sanctioned as a separate item in the Tank Restoration Scheme. A separate statement as per Public Works Code, Volume IV, chapter VIII, paragraph 26 (e), has therefore been prepared (*vide* statement B), which it is requested may be the sanctioned scale of the establishment for the Tank Restoration Scheme during the year 1894-95. If this is done transfers can be made from one party or office to another according to the requirements of the service without a reference to Government. Unless this is done, the Examiner of Public Works Accounts is apt to object to the transfer because the scale of pay in the particular party does not provide for the man so transferred.

9. The total estimate for Tank Restoration Scheme establishment is Rs. 22,000 less than last year if the pay of the Engineer and upper subordinates is included.

CHEPÁK, (Signed) R. R. E. DRAKE-BROCKMAN, Lt.-Col., R.E.,
20th Jan. 1894. Chief Engineer for Irrigation,
Tank Restoration Scheme.

To the Chief Engineer, Public Works Department.

Office-note from the Examiner, Public Works Accounts, dated Madras, 27th February 1894, No. 722 D.

[Your office-note No. 403 C., dated 29th January 1894.]

Checked and found correct as to present scale.

2. I have discussed the proposals with the Chief Engineer for Irrigation, Tank Restoration Scheme, and we agree that if the recommendation contained in paragraph 8 of his note is sanctioned by Government, it will be necessary for all Tank Party establishment bills (*i.e.*, for salaries, travelling allowances, and contingencies) to be rendered to him monthly after payment, and that one salary, one travelling allowance, and one contingent bill for the whole Tank Restoration Scheme be compiled in his office, for submission to audit, in the same way as an Executive Engineer in charge of a division prepares bills for his division including the claims of his sub-divisional offices. This will simplify audit against a general sanctioned scale without reference to the particular party in which a man may be serving.

3. I understand that it is not intended to allow any alteration to be made in the rates of salary that may be sanctioned by Government; and on this assumption I venture to endorse the recommendations under consideration as a distinct improvement on the present plan of having a separate sanctioned scale for each Tank Party.

4. In paragraph 3 of his note, the Chief Engineer for Irrigation proposes that the temporary clerkship on Rs. 80 per mensem in the head office should be filled by a passed overseer or draughtsman. With reference to this, I would remark that a clerk on Rs. 80 per mensem will have to pass the Précis-writing Test unless Government intends to allow the appointment to be filled by a passed overseer or draughtsman of any particular class. But in this connection I would strongly urge that the responsibility for seeing that all employés engaged under this sanction are duly qualified under the examination rules may be vested in the Chief Engineer for Irrigation, Tank Restoration Scheme, and that the Examiner be empowered to accept his certificate on each month's salary bill to the effect that the requirements of those rules have been fulfilled in each case. This corresponds with the practice in the Civil department, where the said responsibility is placed on the heads of offices, and I see no audit objection to it, especially as these men are temporary and non-pensionable.

ORDER—dated 13th March 1894, No. 711 W., Public Works.

The revised scale of establishment proposed by the Chief Engineer for Irrigation in connection with the Tank Restoration Scheme for 1894-95 is sanctioned on the conditions specified by the Examiner, Public Works Accounts. It is noted that, as regards the head office, the scale now fixed will not be liable to alteration so long as the present number of tank parties remains the same. Should any exemption from the examination rules be desired in order to fill up any particular appointment, a special application should be submitted for the orders of Government in the Educational Department.

2. This sanction has been registered as Provincial No. 76 W. of 1893-94 and classified as Establishment, Temporary.

10/20 1 P.m.

Note by the Chief Engineer for Irrigation
J. H. Scheme
No 6 En.

The accompanying statement, showing the establishment required during 1894-95 in connection with Tank Restoration Scheme investigation, amounting to Rs ~~44,572-2~~ ^{44,572-2} 46,668 is submitted to Government for sanction with effect from the 1st March 1894.

2. It will be noticed that the statement differs considerably in detail from that submitted last year, the strength of Surveyors and Draughtsmen being considerably increased and the clerical branch reduced in numbers.

3. In the Head office the establishment is proposed to be reduced by one clerk and one tracer as owing to the introduction of printed plans and estimates for sluices, these men are no longer required. On the whole there is a saving, however, of Rs 8 only, as various small increases of pay are proposed to be given. An increase of Rs 20 per annum is proposed to be given to the manager.

This

this increment is proposed because Mr.
Duby has done exceptionally good work
and for some time past has had his work
materially increased owing to the Head
Clerk (No 2 in the list) having reverted to
his permanent place in the office of the
Chief Engineer for Irrigation. It has been
evident for some time past that the
Memoranda and plates which form one of the
most important results of Tank investigation
were not receiving the attention due to them
and were piling up much in arrears. The
Head Clerk's post was, therefore, not filled
up and a passed Assistant Engineer
was appointed in his place to work up
the descriptive memoirs and plates. This
man has now resigned his permanent
post in the Civil Engineering College
and it is proposed in future to reserve
it for a passed Engineer or Draughtsman.
The result is that the work formerly done by
the Head Clerk in addition to his previous
duties and the small increase of Rs 20
is proposed to raise his pay to Rs 200

which is not considered to be too much
for the work he has to do. 2 P
(2) Instead of a Head Clerk drawing
Rupees 100 per mensem, it is proposed to
appoint a passed Engineer or Draughtsman
on Rs 80 per mensem, to look after the
Descriptive memoirs and plates.
(3) A 10 increase of Rs 10 is proposed
to be given to the Head Draughtsman
who is an exceptionally good man and
works well and hard. He ranks as a special
draughtsman and as such, would, if he
were in a Superintending Engineer's Office,
be now drawing Rs 130 per mensem. He
holds certificates from numerous officers
all of which are of the most favourable
character and is considered to be fully
deserving of the small increase of pay
now proposed.
(4) The other changes in the Head Office
consist of the abolition of one Clerk and
one tracer whose services are no longer
required and certain small increments
to bring the pay of appointments to
round numbers. The scale now proposed
may

not sufficiently numerous ⁵¹¹ to fully occupy
the time of the Overseer in charge:

5. The Parties with the exception
of VIII will in future, be all of the
same strength viz:

- 1 Overseers
4 Surveyors
3 Draughtsmen
2 Clerks.

138 Party will, it is related complete the Bureau having now in hand by
end of June next when the Party may be broken up -
increases of pay are proposed because
great difficulty is experienced in
keeping men. Directly a man has
learnt his work he casts about for employ-
ment elsewhere where he can obtain better
prospects, and therefore, in order to induce
men to remain in the Tank Restoration
Scheme, some slight increments are proposed.

7. The Chief items of increase are in a
Party which up to date has been working
in the Krishna District under the
Superintending Engineer 2nd Circle.
It is proposed, at the request of the
Superintending Engineer 5th Circle to
be taken by the Collector of Chingleput,
to start this party in the Chingleput
District.

District under an upper subordinate,
and it has accordingly been brought
up to the strength of other Parties working
directly under the Chief Engineer
for Irrigation.

8. A good deal of inconvenience has
been caused by each party being sanctioned
as a separate item in the Tank Restoration
Scheme. A separate statement as per P.W.
Code Vol. III Ch. VIII para 2 (C) has therefore been
prepared (vide statement (B)) which it
is requested may be the sanctioned scale
of the establishment for the Tank
Restoration Scheme during the year
1894-95. If this is done transfers
can be made from one party or office
to another according to the requirements
of the service without a reference to
Government. Unless this is done
the Examiner of Public Works
a remarks is apt to object to the transfer
because the scale of pay in the
particular party does not provide
for the man as transferred.

9. The total estimate for Tank

13/711
Restoration Scheme establishment
is Rupees ~~15,000~~^{22,500} less than last year
if the pay of the Engineer and upper subordinates is
included.

130

To
W.

Your office note No. 403 C. dated 28th.
January 1894.

Checked and found correct as to
present scale.

2. I have discussed the proposals with E.I./T, and we agree that if the recommendation contained in para 8 of his note is sanctioned by Government, it will be necessary for all Tank party Establishment bills (i.e. for salaries, travelling allowances, and contingencies) to be rendered to him monthly, after payment; and that one salary, one travelling allowance and one contingent bill for the whole Tank Restoration Scheme be compiled in his office, for submission to audit in the same way as an Executive Engineer in charge of a division prepares bills for his division including the claims of his sub-divisional office. This will simplify audit against a general sanctioned scale, without reference to the particular party in which a man may be serving.

I understand that it is not intended to allow any alteration to be made in the rates of salary that may be sanctioned by Government, and on this assumption I venture to endorse the recommendations under consideration, as a distinct improvement on the present plan of having a separate sanctioned scale for each Tank Party.

4. In para 3 of his note, the E.I. proposes that the temporary clerkship on Rs. 50 per mensem in the head office should be filled by a passed overseer or draftsman. With reference to this, I would remark that a clerk on Rs. 50 per mensem will have to pass the Precise writing test, unless Government intends to allow the appointment to be filled by a passed overseer or draftsman of any particular class. But in this connection I would strongly urge that the responsibility for seeing that all employees engaged under this sanction are duly qualified under the examination rules, may be vested in E.I., and that the Examiner be empowered to accept his certificate on each month's salary bill to the effect that the requirements of these rules have been fulfilled in each case. This corresponds with the practice in the Civil Department, where the said responsibility is placed on the heads of offices, and I see no audit objection to it, especially as these men are temporary and non-pensionable.

G. H. S. S. S.

For orders. 17/11

The reasons for the proposed changes are fully discussed by E.I.

As regards the head office, the scale now proposed is said to be final so long as the present number of Tank parties remains the same.

The proposal in para 4 of E.I. office note may perhaps be accepted. The matter now before the Govt. is the scale of Establishment. As to how the sanctioned appointments are to be filled is a different question. If any departure from the Examination rules is desired, a separate proposal should be made for consideration in the Educational Dept.

Sargan: T. R. Scheme — No. 6. E. W. of 20th Jan'y: 194

Office note from the Examiners

P. W. accounts — No. 722. D of 27th Feb'y: 194

14

The revised scale of
Establishment proposed
by the Chief Engineer
for Irrigation in con-
= nection with the
Tank Restoration Scheme
for 1894-95 is sanctioned
on the conditions spe-
= cified by the Examiners
P. W. accounts. It is
noted that, as regards the

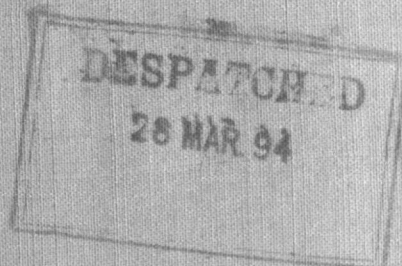

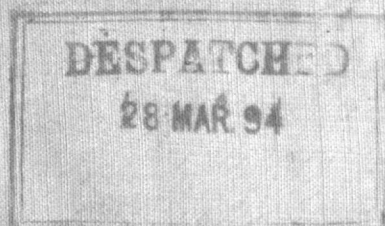

the head office, the
scale now fixed will
not be liable to al-
-teration so long as
the present number of
tank parties remains
the same. Should any
exemption from the
examination rules be
desired in order to
fill up any particular
appointment, a special
application should be
submitted for the orders
of Government in the
Educational Department.
