proper, on estimates regularly and locally sanctioned, but these also cannot be exceeded.

2. From the notes printed with the L.O. and the Code rule <sup>quoted</sup> therein it would appear that the above restrictions <sup>are</sup> removed from 1<sup>st</sup> April next; that is, that specific grants for individual original works under 43 - Ordinary Irrigation and Agricultural, can be transferred to increase the lump sum grants for minor works and Repairs, and vice versa, without any reference to the Chief Engineer for Irrigation or Government.

3. It would also appear that in the cases of works under 49 Irrigation and 43 minor works for which Capital and Revenue accounts are kept grants are to be made for each work and not as at present for several component works of a project or system, and lump sums as at present are to be made under 42 major works - Extensions and Improvements and maintenance and Repairs.

4. I wish to know whether my reading as above of the Proceedings of Government and the Code rule quoted therein is correct.
