Report to accompany the proposition statement for the Survey Establishment required for marking highest flood levels in the Naranaveram River.

In 1885 plans and Estimates were submitted for Embanking the Naranaveram River which Estimates were returned unsanctioned with orders that fresh levels &c should be taken, and an Estimate sent in for the Survey Establishment necessary, vide Irrigation Chief Engineer's no. $\frac{V}{5\,C.N}$ of 13-1-85 bearing S. E. Endorsement no $\frac{4370}{24\text{-}2\text{-}85}$

2. An Estimate amounting to Rs 220 providing for the Employment of a Surveyor and lascars was sanctioned in register no 53 of 1892-93. The Surveyor was not Employed in 1892-93, but on

the occurrence of a flood in November 1893 it became important, not to lose the opportunity of observing the levels to which this flood rose, at different parts of the River and a Surveyor was Employed under the Sanction above quoted to do this work and to take the levels necessary for the revision of the Estimates returned in 1885.

3. As under Chief Engineers memo No 3518 C of October 1893 the cost of Survey Establishment should be debited to Temporary Establishment, it now becomes necessary to submit the accompanying proposition statement for the Sanction of Government.
