The Secretary to Government
Revenue Department

Proceedings of the Board of Revenue

(Revenue Settlement, Land Records and Agriculture).

Dated 30th April 1895.

No. 2222 Miv

READ the following letter from the Collector
of South Arcot, dated 23rd
June 1894, Refers to Rys No. $\frac{141}{13a}$:-

x x x
4. At Vriddhachalam, Chidam-
baram and Marumudi
the new gauges have not
yet been brought into use. At
Vriddhachalam, the pillar
has been erected in the com-
pound of the Civil Dispensary
which is a furlong from the
Taluk Cutcherry. At Chidam-
baram, the new pillar has been
erected on the bank of a tank

the Taluk catchery, and as it might easily be tampered with by men and cattle, the Subildar recommends that the gauge may be fixed in the compound of the new Taluk catchery which is now under construction. I am addressing the District Surgeon on the subject. At Marmayudi, the new gauge has not been brought into use pending the felling of some trees in the neighbourhood at the termination of the annual lease with the current fodi. At Bhavnagar, the site selected was reported to be unsuitable, being overhung with trees. The Head Assistant Collector has taken steps to fell the trees and the place can be secured by a fence. I have issued orders for

for the new gauges being used at these stations as early as possible.

Read also the following letters from the Collector of South West, dated 13th February 1895, Reference no. $\frac{380}{acc}$.
Adverting to para 4 of my letter dated 20th June 94, Reference no. 141, and Board's Proceedings dated 20 July 94, No. 4314 His. I have the honor to report that the District Surgeon does not approve of the location of the rain gauge in the compound of the new Taluk catchery at Chidambaram, which is not sufficiently spacious for the purpose. The Head Assistant Collector and the Subildar have accordingly selected the compound of the District Commissioner's court

plan of which is enclosed. The spot (A) on which the Rainingauge is to be placed is about 72 feet from any building or the compound wall, nor are there any trees in the compound. It is conveniently situated being adjacent to the new Taluk cutchery. This is the best site available at Chidambaram, and if the Board approve of it, I request that the judicial Department may be addressed.

2. The cost of raising the pillars (Rs 25) has to be sanctioned from savings, as it has not been provided for in the budget.

Read also the following Board's reference thereon, dated 4th March 1895, to the Collector of Tanjore.

The Collector is requested to ascertain whether the District

15th March 95
J. S.
14th March 95

Judge has any objection to the proposed site being used as a rainingauge station. If the District Judge assents, the site selected has the Board's approval.
Read also the following letter from the same office, dated 11th April/95
At Rs 300
acc of 95:—

Adverting to the Board's reference on Register No 880, dated 4th March 1895, I have the honor to state that the District Judge has no objection to the location of the rainingauge in the compound of the District Munsiff's Court at Chidambaram at the place indicated.

I have the honor to request that the sanction of Government may be obtained for the erection of a rainingauge pillars by the Public Works Department on the

site now selected for the purpose.

Resolution

The papers will be submitted
to Government, with the request
that orders may be issued
to the Public Works Department
for the removal of the rain
gauge pillar at Chidambaram
from its present site, and its
erection in the compound of
the District Munsiff's court.
