PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following Proes. of the Bd of Rev., 2. R. dy 18 apl. 1895, N° 1964 Mis., on the following letter from the Coll. of Tinnevelly, dy 6 apl. 1895, Reg A on Cos. 279 ful: —

Referring to B.P. N° 3946, dy 18 July '94 which conveyed the sanction of Govt to the preparation of estimates for certain additions to and alterations in the Taluk Cutcherry buildings at Satūr, I have the honor to report that after inspection and consultation with the Superintendent of Police, I am of opinion, that the proposals hitherto made require modification and that out of the three works mentioned in para 2 of BP N° 3092 Mis. dy 5th June 1894 the first viz: the erection of a new office for the Stationary Sub-Magistrate at Satūr, is the only proposal which requires no alteration.

2 Item N° 2 will be a very useful work; but the rooms (cells) when extended (by breaking down partition walls and putting in larger windows) will be very useful for the Tahsildar's Establishment, which at present works in a miserably cramped area, but ought not to be used any longer as sub-jail rooms, for which they are very

Subjail building of standard design, not sited within the confined space of the Taluk Cutcherry walls, but in the open ground between the present Sub Registrar's office and the proposed Sub-Magistrate's office and facing the Police station. This will be a far more Convenient arrangement for all concerned and far more healthy for the prisoners. The highest number of prisoners which has been accommodated in the Saltur Subjail in recent years is 22; and as Saltur is a place where under-trial or Convicted prisoners of Srivilliputtur Taluk are often confined on their way to Palamcottah, I consider that the new subjail should provide accommodation for at least 21; i.e. two cells for 6 prisoners and 3 cells for 3 prisoners each.

4. A cook room will also be necessary for the prisoners, in place of the present thatched shed marked 'Shed' in the site plan which will not do as a permanency, and may be removed.

5. The Executive Engineer also proposes to pull down the dividing wall east of the Tahsildar's court room and to replace the mud wall in the south west angle of the compound by a masonry wall similar to the other

pound as a lodging for 'cattle concerned in cases'. For this purpose, it is suited by its proximity to the Police station. A new pound can be built at some site to be hereafter selected near the road and the Pound Fund might be credited with the value of the present pound.

7. I enclose a site plan and a plan of the cutcherry building (to be kindly returned) which will help to make the proposals more clear. I have asked the Executive Engineer to stay the preparation of the estimates pending this reference. I request the favor of early sanction to these revised proposals.

Resolution

Submitted for the orders of Government with reference to G.O. dated 25th June 1894, No. 1570 Ld Communicated with G.O. Revenue 4th July 1894, No. 2661 Rev.

2. The Board supports the Collector's proposals.

Order thereon 8 June 1895, No. 2284 Mis.

The Collector's proposals supported by the Board of Revenue are approved, but,

far as the new Subjail buildings are concerned, on the distinct understanding that, in consequence of the new position of the Subjail, no addition will be required to the strength of the district police. An assurance on that point should be obtained and forwarded to Government.
