

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following papers:-

From the Presidency Port Officer, dated 5th July 1895, No. 1768/176 G, regarding the arrangements that are to be made in connection with the exhibition of the light on the mainland opposite the Sacramento shoal.

From the same Officer, dated 8th July 1895, No. 1271/175 G, requesting that the Executive Engineer, Godavari, Western Division, be asked to report fully on the site proposed near the Sacramento shoal for a new light.

O. R. D. E. 3, dated 13th July 1895, No. 24.

The Government is advised that there is no necessity to delay until September in exhibiting the temporary light opposite to the Sacramento shoal. It is understood that the new light which is now ⁱⁿ readiness at Calingapatam, is occulting but that it can be used as a fixed light by merely not putting the occulting machinery in motion. There seems to be no impediment therefore to the temporary light being at once removed from Calingapatam to the new site, which should be selected and reported only by the Public Works Department with the least possible delay.

2. The new light at Calingapatam can be exhibited as a fixed red light until the 1st September when the occulting apparatus can be brought into use. If red cylinders are not available for the large two wick burner the Presidency Port Officer can no doubt arrange to transfer temporarily a suitable burner from some other light house station.

3. The Public Works Department will be requested to take very early steps in communication with the Presidency Port Officer to provide the requisite buildings at the site opposite the Shoal regarding which it is understood the Local Executive Engineer has already been addressed.
