Read—the following papers :—

Proceedings of the Board of Revenue (Land Revenue), dated 3rd November 1894, Mis. No. 6055.

Read—letter from the Acting Collector of Tanjore, dated 13th October 1894, No. 2554-Ver.

Resolution—dated 3rd November 1894, Mis. No. 6055.

The plans and estimates for constructing the Collector's office at Tanjore at an aggregate cost of Rs. 1,25,800 are submitted for the sanction of Government with reference to G.O., dated 13th September 1893, No. 2355 W., communicated with G.O., 23rd September 1893, No. 3505, Revenue.

2. With reference to paragraph 3 of the Collector's letter read above, the Board observes that the ground area of the treasury strong room (plan No. 10) cannot be increased without an alteration of the entire design. The treasure boxes in the existing treasury are only from 3 to 4 feet high. They are old and not as secure as they should be. In the new treasury, when built, space may be economised by providing iron chests 9 or 10 feet high, with two inner shelves about one yard apart, and perpendicular doors opening outwards. The upper shelves can be easily reached with a step-ladder. One row of chests may run the entire length of the room resting against the inner wall, and a double row may occupy the centre of the room along its length. The stamp almyrahs can occupy the spaces between the windows. If this be done, the Board believes that the room will be adequate.

3. It does not approve the Architect's proposal that the treasure should be kept in masonry receptacles (presumably wells sunk in the floor), as the verification of balances kept in such wells would be difficult.

(True Extract.)

(Signed) L. M. WYNCH,
Secretary.

Mis. No. 4505.

The plans and estimates are approved and will be transferred to the Public Works Department.

FORT ST. GEORGE,
19th November 1894.

(Signed) R. C. C. CARR,
Under Secretary to Govt.

Memorandum in the Public Works Department, dated 2nd April 1895, No. 1384 C.

Proceedings of the Board of Revenue (Land Revenue), dated 17th June 1895, Mis. No. 3006.

Read—G.O., dated 5th June 1895, No. 2247, Revenue.

Resolution—dated 17th June 1895, Mis. No. 3006.

Provided the office accommodation be in no way reduced, the Board thinks it immaterial, from a revenue point of view, whether or not the stair-case tower is retained as part of the design, or dispensed with.

2. The Board does not understand how the Chief Engineer proposes to utilize the space (42 feet × 42 feet) which is allotted to the tower in the design. It does not appear practicable (without a radical alteration of the plan) to occupy the space by merely shortening the two wings.

(True Extract.)

(Signed) R. C. C. CARR,
Acting Secretary.

Mis. No. 2554, Revenue.

Transferred to the Public Works Department.

OOTACAMUND,
27th June 1895.

(Signed) E. GIBSON,
Secretary to Government.

Note by the Chief Engineer, Public Works Department.

Submitted for the consideration and orders of Government.

2. The space occupied by the tower could be used in any way that might be considered desirable, but, on further consideration, the undersigned is of opinion that the injury to the architectural appearance of the building by the omission of the tower would be greater than the saving of cost would justify, and therefore recommends that the original design be adhered to.

3. No funds have been provided for the work in this year's budget, but any allotment that may be required can be made from the reserve.

OOTACAMUND,
2nd July 1895.

(Signed) J. PENNYCUICK, Colonel, R.E.,
Chief Engineer, P.W.D.

ORDER—dated 11th July 1895, No. 1705 W., Public Works.

The estimate amounting to Rs. 1,25,800, for constructing public offices at Tanjore, is sanctioned. Provision is made for the accommodation of Local Board establishments. The Superintending Engineer will report the amount of rent recoverable on this account and will apply for such funds as can be utilized on the building during the current official year.

2. This sanction has been registered as Provincial No. 40 W. of 1895-96, and classified as Civil Buildings, Original works.

Telegram to the Superintending Engineer, V Circle, dated 7th August 1895, No. 702 D.
Petition from K. Kalyanasundaram Aiyar, B.A., B.L., Chairman, Public Meeting, Tanjore, dated 10th August 1895, No. 702 D.

From Lieut.-Colonel C. C. RAWSON, R.E., Superintending Engineer, V Circle, to the Chief Engineer, Public Works Department, dated Chepâk, 5th September 1895, No. 330 W.

As directed in your demi-official letter, dated 7th August, and your endorsement No. 759 D., dated 18th August 1895, I visited Tanjore on the 29th ultimo, and inspected the various sites for the new public offices and consulted the local officials and now have the honour to submit the following report.

2. Plan marked A is a tracing showing the ground near the Tanjore railway station and the positions of the existing buildings, and on this plan are marked three sites which I consider are the only ones on which the new offices can be built, and this opinion is shared by the local officials whom I consulted.

3. Site No. 1 is the one originally selected and is undoubtedly the best one available. I cannot find out by whom it was originally selected, but recently Mr. Winterbotham, when Collector of Tanjore, recommended it to the Board of Revenue as being in his opinion the only site available. No. 1 site has the following advantages not possessed by the other two. The ground belongs to Government and is perfectly clear; there is therefore no expense for land compensation or for clearing the site, the main buildings are on high grounds facing in a northerly direction and falling away from the front of the building, which can therefore be seen to the best advantage.

4. No. 2 site is the one upon which the local officials wish the offices built (see the remark signed by them on the site plan B) and is also the one mentioned in the proceedings of public meeting recently held in Tanjore. Tracing B shows the proposed arrangement of the buildings and tracing C gives various sections of the ground. There are no objections to this site from an engineering point of view; the foundations will be excellent, the building will face north and south, but the front will be to the south instead of to the north as in No. 1 site; the only drawback is the additional expense, and that the slope of the ground is towards the front of the building.

The site is under cultivation and there are on it a considerable number of palmyra trees and an old ruined choultry. The cost of the site, &c., I estimate as Rs. 4,000, clearing and levelling Rs. 1,000, raising basement of main building Rs. 2,000.

Referring to tracing C, the level of the basement of the Sessions Court is +23·02. In the sanctioned estimate for new offices, the difference of level between top of basement and bottom of foundations is 11 feet, 3 feet of which is height of basement and 8 feet foundations.

In this site, we shall, I think, be able to reduce depth of foundations to 6 feet which will give an extra 2 feet for basement, making the top of it + 19·50 instead of 17·50 as shown in tracing with 8 feet foundations. Three feet more will have to be added to bring level of top of basement to + 22·5 which is within 6 inches of that of the Sessions Court opposite.

5. At the public meeting held in Tanjore the native opinion was in favour of this site; when I visited Tanjore this had changed and all three of the native gentlemen that I saw, viz., the Chairman of the Municipal Council, the Deputy Collector and the Tahsildar were all in favour of No. 3 site, their objection being that the noise in the press building would disturb the patients in the adjoining hospital. It was pointed out to them that the press could be placed not less than 100 yards away from the nearest hospital building; that the press only worked during the day and that it would not make nearly as much noise as the whistles of engines engaged in shunting in the station, which went on all day and the better part of the night also.

6. No. 3 site shown on tracing D is on the south side of the Vallam road between the club and the jail. The soil is hard gravel with laterite rock close to the surface, the site is very rough and would require a considerable expenditure in levelling; on the other hand there would be a saving in foundations. Cost of site would be about Rs. 2,000, levelling, &c., about the same; this would be mostly covered by reduced depth of foundations. This is the site which the native officials wish for, but it is objected to by the Collector on the ground of insecurity and distance from the town. If a house should have to be built for the Collector at Tanjore, No. 3 site is the one on which I think it should be built.

7. The question of altering the sanctioned site is one entirely of expense. If the new offices are placed on the site No. 2 selected by the local officials it will raise the cost of the buildings by about Rs. 7,000. It is most desirable that the inhabitants of Tanjore, European and Native, should have an open space for recreation. I can form no opinion as to whether Government may consider this advantage worth the extra expenditure.

Note by the Chief Engineer, Public Works Department.

The Superintending Engineer states very clearly the circumstances of the three sites proposed.

2. The objection to No. 1 site (that originally proposed) is that it occupies the principal recreation ground of the residents in the town and this is an objection worthy of serious consideration.

3. No. 3 site is objected to by the Collector on the ground of its distance from the town and insecurity.

4. The only real objection to No. 2 appears to be one of expense. It will cost about Rs. 7,000 more than No. 1 and about Rs. 4,000 more than No. 2; considering that the building is estimated to cost Rs. 1,25,800, I do not think this should be allowed to weigh against the other advantages of the site.

5. A further objection has been raised that the noise of the press will be detrimental to the patients in the neighbouring hospital, but I do not think much weight need be attached to this. As pointed out by the Superintending Engineer, the press is more than 100 yards from the nearest of the hospital buildings, and the annoyance caused by it cannot compare with that caused by the railway.

6. The Collector, the District Judge, and the chairman of the municipality are all in favour of No. 2 site, and I recommend its adoption.

OOTACAMUND,
9th September 1895.

SEPTEMBER.

Public offices at Tanjore

Approving of certain sites for the construction of the — and the Collector's house, and directing the Superintending Engineer to proceed with the office building as soon as possible.

Copy of the resolutions passed at the public meeting of the residents of Tanjore held in the local Reading Room at 5 P.M. on the 10th August 1895 —

I That the maidan to the west of the District Court of Tanjore being the only recreation ground of the kind available to the Tanjore Public, it is undesirable to build thereon the proposed office for the Collector of Tanjore, unless no other site is procurable –

II That this meeting humbly suggests that the ground north of the District Court on the northern side of the public road may be acquired and utilized for the purpose –

III. That this meeting hopes that the alteration now proposed will not involve any appreciable delay in the construction of the proposed building.

IV That the Chairman of this meeting be requested to communicate these resolutions forthwith to Government.

SIR,

As directed in your demi Official letter dated 7th August, and your Endorsement No. 759 D dated 18th August 1895, I visited Tanjore on the 29th ultimo, and inspected the various sites for the new Public offices and consulted the local Officials and now have the honour to submit the following report.—

2. Plan marked A is a tracing showing the ground near the Tanjore Railway Station and the positions of the existing buildings, and on this plan are marked three sites which I consider are the only ones on which the new offices can be built, and this opinion is shared by the Local Officials whom I consulted.

3. Site No. 1. is the one originally selected and is undoubtedly the best one available. I cannot find out by whom it was originally selected, but recently Mr. Winterbotham when Collector of Tanjore recommended it to the Board of Revenue as being in his opinion

the

P. W. CURRENT

the only site available. No1. Site has the following advantages not possessed by the other two. The ground belongs to Government and is perfectly clear, there is therefore no expence for land Compensation or for clearing the site, the main buildings are on high ground facing in a northerly direction and falling away from the front of the building, which can therefore be seen to the best advantage.

4.° No 2. Site is the one upon which the local officials wish the offices built (See the remark signed by them on the site plan B) and is also the one mentioned in the proceedings of Public Meeting recently held in Tanjore. Tracing B shows the proposed arrangement of the buildings and tracing C gives various sections of the ground. There are no objections to this site from an Engineering point of view: the foundations will be excellent, the building will face North and South but the front will be to the South instead of to the North as in No1. Site - the only drawback is the additional expence, and that the slope of the ground is towards the front of the building.

The site is under Cultivation and there are on it a considerable number of palmyra trees and an old ruined Choultry. The cost of the site &c. I estimate as Rs 4,000 - Clearing and levelling Rs 1000 - raising basement of main building Rs 2000.

Referring to tracing C, the level of the basement of the Sessions Court is + 23.02. In the sanctioned Estimate for new offices the difference of level between top of basement and bottom of foundations is 11 feet, 3 feet of which is height of basement and 8' foundations.

In this site we shall I think be able to reduce depth of foundations to 6' which will give an extra 2' for basement. Making the top of it + 19.50 instead of 17.50, as shown in tracing with 8' foundations. Three feet more will have to be added to bring level of top of basement to + 22.5 which is within 6" of that of the Sessions Court opposite.

5. At the Public Meeting held in Tanjore the Native opinion was in favour of this site; when I visited Tanjore this had changed and all three of the Native Gentlemen that I saw, viz the Chairman of the Municipal Council, the Deputy Collector and the Tahsildar were all in favour of No. 3 Site, their objection being that the noise in the press building would disturb the patients in the adjoining hospital. It was pointed out to them that the press could be placed not less than 100 yards away from the nearest hospital building - that the press only worked during the day and that it would not make nearly as much noise as the whistles of Engines engaged in Shunting in the Station, which went on all day and the better part of the night also.

6. No 3. Site shown on tracing D is on the South side of the Vallam Road between the club and the Jail. The Soil is hard gravel with laterite rock close to the surface, the site

is very rough and would require a considerable expenditure in levelling; on the other hand there would be a saving in foundations. Cost of site would be about Rs 2,000, levelling &c about the same, this would be mostly covered by reduced depth of foundations. This is the site which the Native Officials wish for, but it is objected to by the Collector on the ground of insecurity and distance from the town. If a house should have to be built for the Collector at Tanjore, No 3 site is the one on which I think it should be built.

7. The question of altering the sanctioned site is one entirely of expense. If the new offices are placed on the site No 2. selected by the Local Officials it will raise the cost of the buildings by about Rs 7,000. It is most desirable that the inhabitants of Tanjore, European and Native, should have an open space for recreation –

I can form no opinion as to whether Government may consider this advantage worth ~~with~~ the extra Expenditure.

10.

As personally instructed yesterday I wrote to Col. Rawson informing him that the question of cost need not be considered, and that if the views of the Collector and those of the people were conflicting the case would be dealt with by Government. Apparently they are conflicting: but if the Collector were to convene a meeting they might perhaps come to an agreement in the matter. It is not clear from para 5 of the S.E.'s letter that the Collector was present at the public meeting held in Tanjore to consider the question of site.
