(41)
only a trifle will have to be spent
on acquiring land, and that the
Submagistrate's office will be in con-
venient proximity to the Subjail. Upon
the whole after local inspection, I am
of opinion that these advantages
outweigh the disadvantages and that
the new building should be built
on the site Mr Brodie recommends
in preference to the apparently better
open site west of it. The building
if built where it is suggested, should
face east.

I have the honor to be,
Sir

Your most obedient servant

C. H. Morrison
Agg Collector

OK
1877

the existing ranger's office Compound
will give a breadth of 100 feet and
the building has a frontage of 88 feet.
The 30 feet strip can be acquired without
interfering with the Mission buildings
and will leave them plenty of room.
Probably it would be better to have
a little more room at the sides and
about 20 feet might be acquired to
the South which would I think
be ample. The probable cost of
acquiring these strips may be as-
certained.

88 The cost of acquiring the strips of
land referred to by Mr Brodie is reported
to be about Rs 10.

89 The objection to the site Mr Brodie
and the Deputy Collector approve of,
is that if selected the present Forest
office and the so-called Subjail hospital,
will have to be demolished and that
a new entrance will have to be made.
The advantage is that if built there,
it will be near enough to the Police
station to avoid having a separate
guard; it will have direct commu-
nication with the trunk Road, so that
only

the Forest Department as office. I mean by this the office room, 13 feet by 18 feet and passage 13 feet by 6 feet, which the District Forest Officer in his note of the 3rd inst states will be sufficient.

4. "2. I suggest that the old building be entirely given up to the police, and that a new office on the standard design be built for the Tahsildar."

3. "The old building is in good order and if the portion now used by the Tahsildar be given over to the police, it will as it stands, afford all the accommodation required by them. Its value is about Rs 3000."

4. "A plan of the proposed Tahsildar's office is herewith sent, the cost of which will amount to about Rs 9000. The Tahsildar might be asked to suggest some site for the building near the police station."

5. On the 21st June 1895 the District Superintendent of Police wrote to suggest that allowing for the accommodation from the present officer in the present building there

there was sufficient accommodation left for the Police Station.

5. Mr. Thomson, who considered the Subject at first thought that a new police station was necessary, but subsequently he wrote to the Executive Engineer that "the Deputy Tahsildar's Office at Sathiaewon is unsuited by want of space to present day requirements and has become more so by the recent extension of the Deputy - Tahsildar's Charge" and asked in reference to enlarging it or building a new one. The answer to his reference was the Executive Engineer's letter which has been quoted above.

The above proves that a new building is wanted and I recommend the one the Executive Engineer recommends. If sanction be given for it, the only question to settle is the site upon which it is to be erected.

outside measurements of which are $19\frac{1}{2}$ ft

Tahsildar's

(31)

The old building will, when a new one is built, be available for the Police and Forest officers.

The Executive Engineer considers the site behind the building cramped and not suitable. I do not think so myself. I send a ground plan which I send. The Deputy Tahsildar proposes to acquire the site now occupied by the Mission's School for the new office. The Wesleyan Mission do not wish to give it up.

The Deputy - Collector proposes the site now occupied by the Forest office with an extension South and West of it and the Court house facing east.

6. Mr. Brodie, the late Ag. Subcollector inspected the site and agreed with the Deputy Collector and expressed his views as follows:—

"I think the least expensive site is that suggested by the Deputy Collector but I would simply acquire a strip of land 30 feet wide to the north of it from the Mission Compound. This with

C. H. Munnsey Esquire
Ag. Collector of Chingleput District

To

The Secretary to the Commissioners
of Land Revenue
Madras.

SIR,

I have the honor to state
that the subject of the accommodation
of the Deputy-Tahsildar of Sathiavedu
and the Police office there has long
been engaging the attention of the
District authorities. If a sub-treasury
be started at Sathiavedu as recommen-

Sub 2611 undr. putted in my letter Reference No. 1337 accb
dated 3rd July 95. the lack of acco-
modation will be more felt than ever.
2. At present it is sufficient to state
that the Police office is in a room, the
outside

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Buildings and Roads,
Civil Works.

READ—the following paper :—

Proceedings of the Board of Revenue (Land Revenue), dated 26th August 1895,
Mis. No. 4296.

Read—the following letter from C. H. MOUNSEY, Esq., Acting Collector of Chingle-
put, to the Secretary to the Commissioners of Land Revenue, dated Saidapet,
15th July 1895, Ref. on No. 2411-Genl. :—

I have the honour to state that the subject of the accommodation of the Deputy
Tahsildar of Sathiavedu and the police office there has long been engaging the attention
of the district authorities. If a sub-treasury be started at Sathiavedu as recommended
in my letter, Reference No. 1337-Acct., dated 3rd July 1895, the lack of accommodation
will be more felt than ever.

2. At present it is sufficient to state that the police office is in a room, the
outside measurements of which are $19\frac{1}{2}$ feet by $6\frac{1}{2}$ feet, the Deputy Tahsildar's records
and treasury (if started according to one of the plans I have suggested) will divide a
room 12 feet by 18 feet, and the Deputy Tahsildar and his gumastahs are left with
two rooms between them, 18 feet by 13 feet and 6 feet by 13 feet—*vide* plan enclosed.
Property in cases and sub-jail stores are stored in what is called the sub-jail hospital,
a small detached building of two rooms 12 feet by 10 feet and 6 feet by 10 feet
respectively. To the west of these buildings there is an open space except for a small
tiled building which is the Forest Ranger's office.

3. I give in next paragraph an extract from the Executive Engineer's letter on
the subject of the new building, and, after personal inspection, may state that I entirely
agree with him, but I should add that the northern part of the old building can also
be given up to the Forest department as office. I mean by this the office room, 13
feet by 18 feet and passage 13 feet by 6 feet, which the District Forest officer in his
note of the 3rd instant states will be sufficient.

4. "2. I suggest that the old building be entirely given up to the police and that a new
office on the standard design be built for the Tahsildar."

"3. The old building is in good order and if the portion now used by the Tahsildar be
given over to the police, it will, as it stands, afford all the accommodation required by them. Its
value is about Rs. 3,000."

"4. A plan of the proposed Tahsildar's office is herewith sent, the cost of which will amount
to about Rs. 9,000. The Tahsildar might be asked to suggest some site for the building near
the police station."

5. On the 21st June 1895 the District Superintendent of Police wrote to say that,
allowing for the accommodation of the Forest officer in the present building, there
was sufficient accommodation left for the police station.

6. Mr. Thomson, who considered the subject at first, thought that a new police station was necessary, but subsequently he wrote to the Executive Engineer that "the Deputy Tahsildar's office at Sathiavedu is unsuited by want of space to present-day requirements and has become more so by the recent extension of the Deputy Tahsildar's charge" and asked in reference to enlarging it or building a new one. The answer to his reference was the Executive Engineer's letter which has been quoted above.

The above proves that a new building is wanted and I recommend the one the Executive Engineer recommends. If sanction be given for it, the only question to settle is the site upon which it is to be erected. The old building will, when a new one is built, be available for the Police and Forest officers.

The Executive Engineer considers the site behind the building cramped and not suitable. I do not think so myself—*vide* a ground plan which I send. The Deputy Tahsildar proposes to acquire the site now occupied by the mission school for the new office. The Wesleyan mission do not wish to give it up.

The Deputy Collector proposes the site now occupied by the Forest office with an extension south and west of it and the court-house facing east.

7. Mr. Brodie, the late Acting Sub-Collector, inspected the site and agreed with the Deputy Collector, and expressed his views as follows:—

"I think the least expensive site is that suggested by the Deputy Collector, but I would simply acquire a strip of land 30 feet wide to the north of it from the mission compound. This with the existing ranger's office compound will give a breadth of 100 feet and the building has a frontage of 88 feet. The 30 feet strip can be acquired without interfering with the mission buildings and will leave them plenty of room. Probably it would be better to have a little more room at the sides and about 20 feet might be acquired to the south which would I think be ample. The probable cost of acquiring these strips may be ascertained."

8. The cost of acquiring the strips of land referred to by Mr. Brodie is reported to be about Rs. 10.

9. The objection to the site Mr. Brodie and the Deputy Collector approve of is that if selected the present Forest office and the so-called sub-jail hospital will have to be demolished and that a new entrance will have to be made. The advantage is that if built there it will be near enough to the police station to avoid having a separate guard; it will have direct communication with the trunk road, so that only a trifle will have to be spent on acquiring land, and that the Sub-Magistrate's office will be in convenient proximity to the sub-jail. Upon the whole, after local inspection, I am of opinion that these advantages outweigh the disadvantages and that the new building should be built on the site. Mr. Brodie recommends in preference to the apparently better open site west of it. The building, if built where it is suggested, should face east.

Resolution—dated 26th August 1895, Mis. No. 4296.

Submitted to Government with the Board's recommendation that a new cutcherry may be built at Sathiavedu for the accommodation of the Deputy Tahsildar and his establishment on the site proposed by the Collector.
