

P. W. Department.

No 3581C. of 21st November 1895

MEMO.

The Chief Engineer has the honour to inquire whether arrangements can be made in the P.W. Workshops for the repair of type writing machines, which are now coming into general use in public offices. There is likely to be a great deal of such work in future.

C. A. W.

During the past fortnight the following clerks have been instructed in type writing viz: Messrs Sincoles, James, Abdul Aziz, Rahimuddin, & Gangadhar Aiyar.

The clerks who were ~~in~~ first started on these machines - M Krishnamachari & T. S. Ramaswami Aiyar - have made considerable progress, & can now work fairly fast. V. Kalyanarama Iyer and J. V. Subramania Aiyar have also made good progress. I am glad to be able to report that these four clerks take a great interest in typing and generally stop in after office hours to practice on the machines.

I have also obtained a small supply of carbon paper & manifold paper on loan from the R office, & the clerks mentioned now understand how to manifold, it is ~~admitted~~ necessary to get a supply of these papers for use with the type writers. An indent

for approval.

The following clerks have not yet been instructed in typing:—the despatcher, the C. K., the asst. budget clerk, the clerk who numbers Memos, & the clerks of the Record Section. It is difficult, with only three machines and a good deal of current work, to arrange for their instruction. It is submitted that we might now apply to the R office for the return of the Remington type writer lent to that office in February 1894. When we get back this machine, one of the Williams' type writers can be set apart exclusively for the use of beginners. An office note to R is submitted for approval.

Govt (in the Public Dept.) has recently ordered a supply of type writers for a ^{large} number of public offices at the Presidency, and as the present Supdt.

good deal about machines,
the present seems an opportune
moment to inquire whether the
repair of type writers could not
be made a specialty of the
P.W. workshops. These machines
often get out of order, and
as far as is known there is
no workshop at the present
in the Presidency, public
or private, which is capable
of repairing them satisfactorily.

Da

Submitted.

It would be a good plan
if the P.W. workshop could take
up the repair of these machines.
There is likely to be a great
deal of work of this class in
future.
