GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Account.

READ—the following paper :—

From S. D. PEARS, Esq., Superintendent of Works, No. I Periyár Division,
to the Chief Engineer, Public Works Department, dated Periyár, 28th
February 1895, No. 230 C.E.

I have the honour to request that you will be good enough to order by telegram from England a duplicate “opening” chain for the sand dredger supplied by Messrs. Priestman to this division in 1892. The single word “opening” chain used above will probably be sufficiently definite, but in confirming the telegram by letter it may be well to explain that of the two chains used on the dredger, the one of which a duplicate is wanted is the smaller one used for opening and lowering the bucket as opposed to the larger one whose office is to close and lift the bucket.

2. I have endeavoured to obtain the required chain locally, but the links are of such unusual proportions that none of the firms applied to could supply it. A good deal of time has thus been lost and the present chain is now so much worn that it already breaks very frequently, and the delay in re-welding it is a great hindrance to the sand supply. The length of the chain is 150 feet.

ORDER—dated 7th March 1895, No. 534 W., Public Works.

Ordered that a telegram be despatched to the Home Government accordingly.

2. The General Superintendent, Public Works Stores, will meanwhile prepare an indent in the usual form for the “opening” chain required.

Telegram to the Director-General of Stores.

“Please supply duplicate opening chain for sand dredger made by Priestman for Periyár works in 1892.”

[Here enter No. 535 W., dated 7th March 1895.]
