GOVERNMENT OF MADRAS.

FINANCIAL DEPARTMENT.

READ—the following papers:—

From the Revd. S. DOMINIC, Superior of the Monastery, Place's Garden, to the Chief Secretary to Government, dated 30th October 1894.

I have the honour to report further on the artesian boring in Place's Garden since the 7th September 1893, up to which date I have had the honour of furnishing Government with a detailed report showing the cost and outturn of work. The Government with their wonted generosity were pleased to sanction a further grant of Rs. 500 in their order dated 4th October 1893, No. 976, Financial. There were many difficulties met with in the boring for want of strong augurs, one of the augurs hitherto used broke at the chisel end and caused very great trouble in the further boring. Special tools suggested by Mr. Wickham were made for extracting the broken piece, but the piece could not be extracted and further boring was impeded for want of a stronger boring augur; one was recently obtained and boring was successfully continued down to an additional depth of 1 foot and $6\frac{3}{4}$ of an inch, the broken piece of tool having been thrust clear off the bore hole. The total depth reached up to date is 386 feet $3\frac{3}{4}$ inches, and the soil met with is *limy clay* in which lime predominates.

2. I beg to append for the information of Government, Statements A and B showing progress of work and cost of boring, &c., and strata of earth passed through. The outturn of work as regards further depth of boring is very poor on this occasion, considering the expenditure, but I hope to be able to make up for the deficiency in the outturn on the next occasion which will be occupied in the tubing of the bore, as recommended by the Public Works Department.

3. According to my statement C, which accompanied my report dated 23rd September 1892 (copy of statement enclosed), the total depth I proposed to bore was 412 feet, but that recommended by Dr. King is 451 feet, so that in addition to 172 feet of tubes as reckoned by the Public Works Department, 39 feet are required; and therefore an outlay of Rs. 422 will be required for pipes alone.

4. Amongst the tools obtained from the Executive Engineer, Nellore Division, the rods especially have been found very useful, but appropriate augurs are not available. A strong chisel augur, 5 inches wide is greatly needed which will have to be procured at an early date.

5. Considering the amount required for continuing on the operations such as tubing and boring, I have the honour to request the Government will be pleased to sanction a further grant, adequate to meet the cost of pipes and working expenses. The balance on hand as will be observed from the statement of cost accompanying is Rs. 71-11-8, and the present depth of water in the bore-hole is 7 feet $11\frac{1}{2}$ inches.

Respectfully awaiting the orders of Government on the subject.

ENCLOSURE.

the full period for the bungalow in use by him as Asst.Collector, subject to the condition that he pays IO per cent of his acting salary for the 2 days he actually occupied the Collector's bungalow, and that rent for both the bungalows i.e.the one he retained and the one he should have occupied, need not be claimed under the strict letter of the rules. As similar cases may however frequently occur again, orders appear necessary as to the rent to be charged when they happen.

3. The normal rent of the Collectors residence at Anantapur is Rs.205 & that of the Head Asst.Collector at Penukonda is Rs.42. The Head.Asst. Collector's pay is Rs.760 and his salary for the time he was in charge of the Collectorate was at Rs.803.

OFFICE NOTE No. 4965 D

To

W.

The following case is submitted for orders-

The Collector of Anantapur Mr. K.C.Manavadan Raja who occupied the Collector's residence at Anantapur proceeded on furlough on the I5th.June I894 & the Head Asst.Collector at Penukonda was in charge of the Collectorate in addition to his own duties as an Head Asst.Collector from I5th.to 27th. June I894,and during that period he reports that he only inhabited the Collector's bungalow at Anantapur for 2 days, but retained and paid rent for the Head Asst. Collector's residence at Penukonda for the whole period.

2. The building at Anantapur was built for the Collector and the officer holding that appointment should therefore under the rules have occupied the building and paid rent for it, giving up his old bungalow. I am of opinion that the claim for rent may under the special circumstances of the case be met by the acting Collector paying rent fo
