THE CHIEF SECRETARY, Judicial
Dep't.

To the Secretary, P. W. D.

It is the honour by direction of the
Chief Secretary to point out that
in P.O. of 6 July 1893 No. 1371 Jnd. Post.
"regarded" a compound wall to
the Tanar Subregistrar's office as
"hardly necessary", and to state
that the same remark appears to
apply to the present case. The mere
fact that the Registrar, Tanore, "has
asked for compound walls and a
gate" is not sufficient reason for
deeming the addition necessary. It
is further to be remarked that the
original estimate only amounted to
Rs. 2640, but it has already been increased
to Rs. 3117 & that it appears undesirable
to ~~reconsider~~ expend more money on the
building. For these reasons the Chief
Secretary is unable to countersign
the supplemental estimate herewith
returned.

-ary 1895.

It seems to me that office compounds
ought to be fenced in — I don't think they can't
be kept neat & clean. I don't ap-
-prove of wire fences, for in the they
easily get out of order & in the long run
must cost more than walls

The Govt. does not
consider the addition of
a compound wall and gate
to the Sub Registrar's office
at Nagore to be necessary.

But is it not usual to put up a
wire fence for the protection of Govt.
buildings?

I think there sh^d. be some report from
some responsible person as to what we
should know whether these buildings
when completed require protection or
not. I should like to have an independent
opinion — as the Sub-Registrar is perhaps
hardly in a position to give one.

Note for His Excellency the Governor

With reference to His Excellency's remarks dated 3rd March, it is submitted that there are no fixed rules in regard to the fencing of Govt. buildings. Wire fencing or walls are used according to requirements, and frequently no fencing at all is provided for.

The Suptg. Engineer was asked to report whether he considered a compound wall to be absolutely required to protect the Sub Registrar's office at Nagore, and whether a wire fence would not be sufficient.

That officer is of opinion that a wall is very necessary as the building is situated in the heart of the town.

Under these circumstances,
it

A wall is certainly required in this instance - but there are places where a wire fence wd. be sufficient - though I must confess I thoroughly agree with Mr. Ellis that wire fences are generally very unsatisfactory. They are certainly cheaper in the first instance - & may be got to last a good many years - but I doubt whether in the long run they are economical.
