Read—the following papers :—

Telegram from the Collector of Kurnool, to the Chief Engineer for Irrigation, dated 1st November 1896.

Vide paragraph 16 new Famine Code. Work needed Pattikonda taluk and elsewhere. Please send forthwith Tank Restoration Party promised letter dated 2nd May.

No. 83 E.W.

Communicated to the Chief Engineer, Public Works Department, for necessary action. Arrangements have been made to transfer the Tank Restoration Party now working in Chingleput to Kurnool as soon as possible. Under existing arrangements the party would have been moved in December; but it is pointed out that the ordinary method of work and organization of a Tank Restoration Scheme Party under the direct orders of this office is quite unsuited to the preparation of famine relief estimates. The duties of a Tank Restoration Scheme Party are, to carefully map out in considerable detail the minor basin selected and to carefully investigate the requirements of such work with reference to its position in the basin and to its drainage area. What I understand to be required by the Collector of Kurnool is the immediate preparation, as quickly as possible, of estimates for work suited to famine relief works, and situated in such localities as the demand for relief work may arise. I think it would be extremely unsatisfactory to both the Collector and the Tank Restoration Scheme if both duties are attempted and I would suggest, if Government deem it advisable so to use a Tank Restoration Scheme Party, that special orders should be issued placing the party on the special duty required of them and under the local Public Works Department officers, and that any attempt to deal with affected areas in the regular tank restoration scheme method should be postponed until the prospects of the district are brighter.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

3rd November 1896.

Telegram from the Superintending Engineer, III Circle, to the Chief Engineer for Irrigation, dated Kurnool, 4th November 1896.

Distress imminent in Pattikonda, Koilkuntla and Sirvel taluks, Kurnool district. Please send promised Tank Restoration Party at once to prepare estimates and carry out works. The latter is essential as present staff insufficient for the purpose.

Office-note from the Chief Engineer for Irrigation, to the Secretary to Government, Public Works Department, dated 4th November 1896, No. 84 E.W.

In continuation of my note on the request of the Collector of Kurnool to send the Tank Restoration Scheme Party now in Chingleput to Kurnool at once, I send for disposal a telegram just received from the Superintending Engineer, III Circle, in which he asks that the party be sent to prepare estimates and *carry out works*, as his present staff is insufficient. This, as I have already suggested in my former note, may be done if deemed necessary, but special orders to this effect are required from your branch and placing the party under the orders of the Executive Engineer or other local officer.

Order—No. 3180 W., dated 6th November 1896.

The action of the Chief Engineer for Irrigation in ordering the immediate transfer of the Chingleput Tank Restoration Party to Kurnool, is approved.

2. The ordinary method of work and organization of a Tank Restoration Party under the orders of the Chief Engineer for Irrigation being unsuited to the preparation of estimates for famine relief works, the members of the party now being transferred will be placed under the orders of the Executive Engineer, Kurnool division, as an addition to his staff, to aid in the emergent drawing up of estimates for relief works.
