

Public Works (1896) Department.

G.O., No. 1227w

DATED 7/4/26.

[Despatch Abstract.]

[Despatch Abstract.]

Panna Cuddapah & N. S. Stating
Report from S.E. III.
that the removal of the ... is likely
to improve the health of the Town
of Cuddapah. Communicated
to the Local & Municipal
Sept.

No. 4017

Superintending Engineer's Office,

3RD CIRCLE,

Bellary 26th March 1896.

From W. B. de Winton, Esquire,

SUPERINTENDING ENGINEER,

3RD CIRCLE,

To

THE Chief Engineer,

Public Works Department

Mysor.

Sir,

Enclosures.

In continuation of this office
X B.N. 300W 24.1.96 to 3166 of 16-1-96, I have the honour

to inform you that I inspected the
Patha Cuddapah tank on 10th instant,
my visit having been delayed by cause
beyond my control.

2. I agree with the Sanitary Board that
the presence of this tank right across the
natural drainage outlet of the town of
Cuddapah, must abnormally raise the
subsoil water in the latter, and that
its removal is likely to improve the
health of the town.

3. I have, therefore, given orders for
the necessary plans and estimates to
be prepared, and I hope they will be
ready by end of April, in time to advise
of

their being carried out before next
season.

4. The matter has been delayed owing
to the alternative proposals referred to
in Para 3 of my No: 3166 of 16-1-96
which I consider, on inspection, to be
untenable, but the estimates could
not have been prepared with accuracy
so long as the tank was full of water,
which it is still in the interests of 2nd
crop irrigation. So, if the estimates
are now submitted speedily, the delay
will have done no harm.

I have the honour to be,

Sir,

Your most obedt: servt

L B C Smith

Superintending Engineer,
S. C. Circle.
