Resolution dated 18 April 1896

In para 6 of his
letter referred to in the order
read above, the Superintend-
ing Engineer, II Circle, states
that he considers forms A
and B prescribed in the
rules for the preparation of
the programme of famine
relief works to be intended

for new works and for repair works respectively. The Board beg to observe that these forms were prescribed for the guidance of Collectors. Form A being the complete programme should show all works suitable and available for famine relief, whether Public Works department, Revenue, Local, Municipal and so forth, including both new works and repairs. Form B, on the other hand, is a simple tabular statement to show whether provision has been made in the programme for all the irrigation works that need repairs; it should include all the existing

5. The Board of Revenue in their Proceedings No. ^{2m} 838 dated 18 February 1896, said that the statement A should include all the original works and repairs as well and the Collector therefore requests me to revise the statements sent to him.

6. I therefore request orders whether original works and repairs should be included in form A. It appears to me that form A is intended (so far as the Public Works Department is concerned) for new works and form B for repair works.
