JUNE.

Superintendent of the Drawing Branch of the office of the Chief Engineer for Irrigation

The statement of proposition for raising the salary of the — from Rs. 100 to Rs. 150 per mensem from 1st April 1896, and for the retention from the same date of two temporary draftsmen for a further period of one year, sanctioned.

No. 1706 W., 8th June 1896.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

Read—the following papers :—

Note by the Chief Engineer for Irrigation.

No. 14 W.

The appointment of the Superintendent of the Construction or Drawing Branch of this office, though requiring chiefly technical knowledge for the discharge of its duties, was, in the scale of establishment sanctioned in G.O. No. 491 W., dated 3rd April 1880, included under "Clerks" as the maximum pay of draughtsmen was then limited to Rs. 70 per mensem, while the nature of the duties of the appointment required more pay to attract a competent man, and it was not then possible to provide for the appointment a higher pay without classing it under "Clerks." Since then the necessity for improving generally the status of draughtsmen has been recognized by Government and the Superintending Engineers are, under G.O. No. 527 W., dated 19th February 1892, now allowed special class of draughtsmen drawing progressive pay rising to a maximum of Rs. 130 a month. But this concession has not been extended to this office.

2. The present Superintendent of the Construction Branch draws now only Rs. 100 per mensem, and this salary he has been drawing from 1st June 1888. His service under Government is nearly 28 years. He performs his duties satisfactorily, and has been commended by the several officers under whom he has served. The work of the Construction Branch has been so considerably increased that two permanent draughtsmen have been sanctioned in G.O. No. 3198 W., dated 13th December 1894, and two temporary draughtsmen in G.O. No. 2912 W., dated 15th November 1895, owing to the necessity for preparing in this office several plans and maps suitable for photo-zincography and for preparing revised lists and maps of component works of several irrigation systems for which capital and revenue accounts are kept of other irrigation works under the Public Works Department and of the tanks affecting railways which have extended to several districts. With this increase of work in the branch the duties of the Superintendent have become more onerous. He has to supervise the work of nine draughtsmen and one statistical clerk. His present pay is less than that of the head draughtsman of several Superintending Engineers' offices, and the plans and estimates received therefrom are scrutinized in his branch. It is understood that the pay of a corresponding appointment in the office of the Chief Engineer, General Roads and Buildings Branch, is Rs. 200 to Rs. 250 per mensem.

3. In these circumstances, it is strongly recommended that the sanction of Government be obtained for raising the salary of the Superintendent of the Construction Branch of this office from Rs. 100 to Rs. 150 per mensem from 1st April next designating him as "Head Draughtsman" instead of "Clerk" as hitherto.

4. As the sanction accorded in G.O. No. 2912 W., dated 15th November 1895, for the two temporary draughtsmen now employed in this office will expire by the end of this month and the lists and maps of tanks affecting railways in several districts have yet to be prepared, it is suggested that the sanction to their employment may be extended for another year.

5. A proposition statement is enclosed.

Chepâk,
30th March 1896.

FOR ORDERS.

The undersigned is unable to traverse the arguments of the Chief Engineer for Irrigation in regard to the amount and importance of the work in his office, and the consequent necessity for the proposed increase to the pay of his head draughtsman and the continuance of the two temporary draughtsmen for a further period of one year, as shown in the Proposition statement. The proposals are accordingly submitted for the orders of Government.

No. 384 P. W.

P. W. D. Form No. 113.

00—12-7-95.

NOTES.

Reference to P. W. D Code.

Chapter I, Para. 30.

1. All proposals for changes in the scales of permanent establishments must be accompanied by a statement in Part I of this form when the changes relate to the engineer or upper subordinate establishments and in other cases by a statement in Part II of this form.

2. The column headed "present scale" should invariably show the existing *sanctioned* scale (not the strength of the establishment as it actually stands at the time), and should be verified by the Examiner before the statements are forwarded to the sanctioning authority.
