Current No. 3978

Letter No 40/W

Dated 25th April 1896

From the Supg Engineer V Circle

NOTE BY TECHNICAL SECTION.

Name of work Open latrines in the compound of the public offices at Negapatam.

Amount of estimate Rs 890

Adverting to this office endorsement No. 1445 C dated 14th March 1896 the S E V Circle submits revised plans & estimates amounting in all to Rs 890 for Constructing open latrines of 6 and 12 seats for clerks & for the public respectively in the compound of the public offices at Negapatam as per designs Nos. 4 & 7 circulated with G. O. No. 3050 W dated 8th Novr 1892 in lieu of the estimate amounting to Rs 1300 previously submitted for the same kind of work with Corrugated iron roofing.

The amount of the estimate is made up as follows:-

		Rs
Clerks latrine with 6 seats	—	Rs 370
Public ——	12 - do —	" 480
Dismantling existing clerks latrine	..	40
Total estimate	Rs	890

H.L 28/5

O.S. 113

The clerks latrine is to measure 33'×6·9" and the public latrine 19'7½" × 14'3" outer dimensions.

The surface & sub soils at site of work are reported to be alluvial.

The foundations of the outer walls & angle iron standards are to be laid to a depth of 18 inches and built of brick in chunam. The floors of the clerks latrine are to be raised 9 inches above ground surface and that of the public latrine 1'-18". The walls of both the latrines are to be of corrugated iron sheets fastened to angle iron standards 1½"×1½"×¼" raised 6'3" above floor level for the Clerks latrine & of S.I.R. iron rails raised 6'9" for the public latrine. The floor of the Clerks latrine to be of brick in chunam & that of the public latrine concrete & both plastered with ½" Portland cement.

The seats of the clerks latrine are to be of teak planks & that of the public latrine of granite slabs.

The rates are fair. 0.70 E

It will be observed that the angle iron standards of the clerks latrine vide plan & estimate, are built into brick masonry foundations, concrete it is submitted would be better. Again the old iron rail uprights of the public latrine are built in brick masonry above ground level. This it is submitted may be let into solid foundations, say 15 to 18 inches below ground surface & not as shown on tracing plan. These uprights should also be bedded in concrete.

It does not matter

Ecs

Drawings like do

The design submitted is exactly in accordance with the drawings prepared by the Sanitary Engineer to Govt & circulated with G.O. No. 3050 W dated 8th Novr. 1892.

The revised plan & estimate have not been countersigned by the Collector of the District.

This should be done before the work is commenced.

TANJORE COLLECTOR'S OFFICE,

Ref on Cir No. 2055/ver of 95

Camp, Tanjore, 14th November 1895.

FROM

G. Stokes, ESQUIRE,

ag COLLECTOR,

Tanjore,

TO

The SECRETARY TO THE COMMISSIONERS

OF Land Revenue

Madras.

SIR,

Under Government Order No 2806 W dated 7th October 1892

I have the honour to request that the Board will be pleased to obtain the sanction of Government for the Construction of a 12 seated latrine on the standard plan at a cost of Rs 1409 for the use of the General public who attend the various public offices situated within the Compound of the Saint Joseph's College Buildings, Negapatam

At present there is only one latrine within the Compound and

and it has to be reserved solely for the use of the officers. The heads of the several offices situated within the Compound are of opinion that the provision of 12 seats in the Public latrine is not too high.

I have the honour to be

Sir,

Your most obedient Servant

To
The Collector of
Tanjore.

Sir,

In reply to your Ref on Cur. No: 2055/Var of 95, dated 12th December 1895, I have the honor to state that open latrines such as those on the South Indian Railway may well be constructed in the place of the roofed structures already recommended, within the Compound of the St. Joseph's College buildings at Negapatam. From the last issue of the Fort St. George Gazette, I find that the No: of rainfall days during 1894-95 was only 45 at Negapatam.

I have &c.
