OFFICE OF THE SUPERINTENDING ENGINEER,
6TH CIRCLE,

16 JUN 1896

Trichinopoly, 19th May 1896.

From

W. Hughes Esq.

The Superintendent Engineer,

6th Circle.

To

The Chief Engineer,

for Irrigation.

SIR,

ENCLOSURES.

I have the honor to submit a revised proposition statement for establishment in connexion with the special work on the Periyar Project - which is being carried out under the direction of Mr. J. W. S. Smyth Esq. - the amount is Rs 3573 for the year against Rs 7650 already sanctioned. The saving is partly due to the establishment being appointed from 1st May or 1st June but chiefly to the employment of only one surveyor instead of six. In place of the others there are four engineers subordinate students who were posted to the work some time ago to save time as it is difficult to get surveyors and for the sake of the training which it will give them.

The

The proposed system of work as stated by Mr. Smyth is as follows:—

(1) The existing staff of Superintendents will retain their present charges, and give such time as they can to investigation. The four students and Surveyor will be employed entirely on Survey work and marking out distributaries.

(2) Ordinarily the lines of the distributaries will be first of all marked out by the sub. Div. officers and then inspected by Mr. Smyth and the Special Deputy Collector when the questions of the abandonment of tanks and provision of drainage courses will be arranged.

(3) Levels will then be taken to show what extent of tank beds can be sold at once and to what depth the drainage course must be dug to drain this land, and every thing marked on the map."

2. As estimates are made, the works will be carried out by the present Executive staff.

I have the honor to be
Sir
Your most obedient servant

W. Tucker
Superintendent

No. 1744 D/2 of 18.6.96.
