

On the W & A

Marine (1896) Department.

G.O., No. 2272 *h*

DATED

7/8/96

[Despatch Abstract.]

*License fees for boats
Orders regarding the payment
of the same into the marine
Govt Treasury*

3. The point raised originally was whether the storekeeper should furnish heavier security. I myself don't see why he should. He is working in the Divisional office and part of his duties in that office is to receive and account for certain sums paid in there. It is the duty of the Executive Engineer to take precautions for the safe custody of the money and for its safe transfer to the treasury, just as he has to take care of all cash.

In the circumstances
stated by the Examiner
the Executive Engineer's
suggestion cannot be
accepted.

2. No further security need be demanded from the storekeeper, but the particular attention of the Executive Engineer should be drawn to the concluding sentence of the Examiner's note.

OFFICE NOTE No. 1987/A

To, W.

Your office note No. 2718 C. dated
3rd. July 1896.

99
99
The proposal is not practi-
cable in my opinion. It would throw on
the Civil Accounts offices work which
should be done in our own offices, and
would undoubtedly cause great delay &
confusion in our accounts, so that I
am sure the Civil Accountant General
would not agree to the arrangement.

2. Apart from this, however, I
doubt whether boatmen ~~or~~ serangs are
competent to fill up the "chalan" re-
quired under Civil Account Code, article
3. Assuming they are, the sums paid
into treasury in (say) July would not
come into the Divisional accounts till
September, (and not till October if
paid in late in July). The treasury
receipts for these sums may be forward-
ed at once to the Divisional office &
licenses issued, but the fees would not
be traceable from the Executive Engi-
neer's accounts. He would therefore be
obliged to keep a record of some sort
to show against each license issued
