Account.

READ—the following paper:—

From Major W. L. C. BADDELEY, R.E., Superintending Engineer, II Circle,
to the Chief Engineer for Irrigation, dated 10th February 1896, No.
2351 K.S.

I have the honour to forward herewith, for your approval and sanction of Government, an estimate, amounting to Rs. 3,270, for constructing a rest-house at Komatigunta weir, Ryves' canal, Kistna Eastern division.

2. The amount of the estimate may be met from the balance of the lump sum provision as per item No. 76 of the statement printed with G.O., No. 857 I., dated 11th October 1893.

3. As the construction of the rest-house at the weir is much needed, I request that early orders may be issued by wire for collection of materials, in anticipation of sanction to the estimate, before the closure of canals.

4. The report which accompanies the estimate explains the necessity for the work.

ENCLOSURE.

REPORT to accompany the estimate for rest-house at Komatigunta weir.

Komatigunta weir is an important regulator on Ryves' canal and near it several large distributaries branch off, including Dosapad channel, a very large and important channel. As Ryves' canal is not navigable, it is difficult to inspect it and its distributaries for want of suitable halting places both for officers and subordinates. The estimate therefore provides for a rest-house of the same type as those already sanctioned at Vadaly and Lekshmipuram.

11th November 1895.
