BOARD OF REVENUE (REV. SETT., L. RDS. AND AGR.), 18TH JUNE 1896, No. 137.

PROCEEDINGS OF THE BOARD OF REVENUE

(REVENUE SETTLEMENT, LAND RECORDS AND AGRICULTURE).

READ—again Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 29th January 1894, No. 48.

ABSTRACT.—Reviewing the progress made in setting up the new Symons' rain-gauges at the rainfall stations in the Presidency, and requesting Government to issue orders to ensure the regular inspection of all stations by the District Surgeons; and requesting the Separate Revenue Department to issue orders for setting up the gauge immediately in any salt factory at which it remains to be done.

READ—again Memorandum from the Board of Revenue (Separate Revenue), No. —, dated 27th June 1894.

ABSTRACT.—Requesting to state if the cost incurred by the Salt Department in fixing Symons' rain-gauges in certain salt factories may be transferred to the head "Scientific and other Minor Departments—Rain-gauges."

READ—also reference thereon, dated 18th July 1894, referring to the Meteorological Reporter for report as to how far the setting up of rain-gauges in salt factories is desirable, all of them being situated on the coast line.

READ—again Board's Proceedings, No. 5322, dated 3rd September 1894.

ABSTRACT.—Requesting the Salt Department to furnish the information required by the Meteorological Reporter to enable her to report on the desirability of setting of rain-gauges at the salt factories.

READ—again Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), dated 19th February 1895, Mis. No. 935.

ABSTRACT.—Communicating, with remarks, to the Meteorological Reporter Proceedings of the Board of Revenue (Separate Revenue) furnishing the information called for in the above Proceedings regarding salt factories.

READ—also Proceedings of the Board of Revenue (Separate Revenue), dated 25th November 1895, No. 3195, Routine.

ABSTRACT.—Furnishing the Board of Revenue (Revenue Settlement, Land Records and Agriculture) further information in connection with rain-gauges in salt factories.

READ—also reference, dated 6th December 1895, forwarding the above Proceedings to the Meteorological Reporter to the Government of Madras in continuation of Board's Proceedings, No. 935 of 1895.

Read—also letter from the Meteorological Reporter to the Government of Madras, dated 1st June 1896, No. 579.

ABSTRACT.—Recommending the inclusion of certain salt factories in the list of authorized rain-gauge stations.

RESOLUTION—dated 18th June 1896, No. 137.

In Board's Proceedings, dated 23rd June 1892, No. 455, it was decided that, out of the 58 salt factory stations, eleven stations should be excluded as being too near other stations where rainfall was already registered, and the remaining stations, some of which were already on the list, as being the head-quarters of Tahsildars or Deputy Tahsildars, should be included in the list of authorized rain-gauge stations and that they should be supplied with Symons' rain-gauges. The Board in the Separate Revenue Department thereupon asked this department whether the Accountant-General might be instructed to debit to this department, the charges already incurred by the Salt Department in erecting rain-gauges at some of the salt factories. The Meteorological Reporter to the Government of Madras was thereupon asked to report as to how far, with a view to improving the record of rainfall generally, the setting up of the rain-gauges in salt factories was desirable, these being situated on the coast

line for which the record was already fairly complete. The Meteorological Reporter in her letter read above recommends the inclusion of the stations noted on the margin.

2. In supersession of the list of stations noted on the margin at paragraph 2 of the Board's Proceedings quoted above, the Board accepts the Meteorological Reporter's proposals with the following modifications. In the Gódvári district, Penuguduru is so near Cocanada and Coringa and Mogalturru to Narsapur and to Pandraka in the Kistna district, whilst Chunampet in Chingleput and Merkanam

in South Arcot are too near each other to render it necessary to set up gauges there. The Board therefore considers that Penuguduru, Mogalturru and Chunampet may be omitted.

3. The Board in the Separate Revenue Department will be requested to arrange with the Public Works Department for setting up the rain-gauges at the remaining stations where they have to be fixed.

4. Two out of the four rain-gauges made available by the abolition of four stations in Chingleput should be sent to Kumblimedu and Manambadi newly added in the South Arcot district; and one from the two stations abolished in the Tanjore district to Keeranur newly added in Tinnevely. The remaining rain-gauges should be returned to the Meteorological Reporter who will hold them in store.
