Report to accompany the Estimate for
Constructing a Second class Ballacut with
iron hull for use on Repalli Main Drain

The Ballacut which is now in use
on Repalli Main Drain became very old
and rotten and any further repairs to
close the leakages & proved to be quite
useless

Therefore a new Ballacut is necessary
at this place owing to the heavy traffic
from Kizampetam to Repalli and other
places, hence this Estimate.

The length and breadth of the Ballacut
will be 15 and 9 feet respectively and
will be constructed in accordance with
the detailed Estimate and plan which
accompanied the Estimates of certain
Ballacuts in this Division sanctioned
in G.O. No 3622.

Sir,

I have the honour to forward
herewith for your approval and
sanction of Government an estimate
amounting to Rs 620 for constructing
a second class ballaent with iron
hull for use on Repalle main drain
in place of the old one sanctioned
in G.O. No 362 I d, 30.4.94.

2. The amount of the estimate may
be met from the balance available
for tools and plant of the Krishna Wells
System.

2. The necessity for constructing the
ballaent is explained in the report
accompanying the estimate.

Shamthy
Your most obedient servant,
W. L. C. Raddely
