ENCLOSURE.

REPORT to accompany the estimate for constructing a Drainage sluice, Right Bank of Ryves' Canal, at 21 miles.

Estimate	2,100

An estimate register No. 581 of 1893–94 has been sanctioned for an inlet in Ryves' canal to drain the lands on the right side, but on subsequent investigation it is considered that a drainage sluice will be more suitable as, owing to the level of the lands, the inlet, the crest of which must necessarily be at F.S.L. of canal, will not admit of their being properly drained. The design and estimate have therefore been revised accordingly.
