Office of the Consulting Architect to Govt.
Chennai, Madras.
17 January 1896.

From

Henry Swin, Esq., C.I.E.,
Consulting Architect
to the Government of Madras.

To

The Chief Engineer
Public Works Department.

Sir,

Enclosures.

With reference to paragraph 2 of G.O. No. 2850 dated the 8th November 1895, I have the honor to report that the plans of the building were prepared by my predecessor and the work was carried up to 1st floor level, — about 22 feet above ground level, when I assumed charge of the Consulting Architects Division. I have no doubt that my predecessor considered that the provision made for lighting was sufficient. The rooms & passages have been utilized for other purposes than what they were intended for. I proposed at first to light through the ceiling only the narrow rooms which are far back next the passages but the Judge required an additional amount of glass near the centre.

These additional light will
in my opinion be of but little use as they
will be covered by the Court furniture and
by the officials in front of the judges chair.
The spaces I proposed behind the judges chairs
will be of use as they are quite unoccupied
and when the passages are cleared out and
put to their original purpose I think it
will be found that the light will be
sufficient.

I have the honor to be
Sir
Your most obedient servant
Harry Innes
Consulting Architect
to Government
