MARCH.

Sanctioning, with remarks, estimates amounting to Rs. 320 for constructing a — to Kalapalampattu-Alantangal tank and a byewash and seven pot sluices in Thorayur channel, Pálár anicut system, and stating that the estimate of Rs. 1,330 for repairing the banks of Thorayur tank supply channel may be sanctioned by the Superintending Engineer.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following paper :—

From J. HANNAN, Esq, Superintending Engineer, IV Circle, to the Chief Engineer for Irrigation, dated 7th March 1896, No. 47 I.

I have the honour to submit, for sanction of Government, plans and estimates amounting in all to Rs. 1,650 for the undermentioned works in lieu of the estimates of Rs. (750 + 710) = Rs. 1,460 sanctioned in G.O. No. 603 I., dated 11th July 1892 (*vide* items Nos. 15 and 8 in pages 8 and 9):—

(1) Constructing a cheap weir to Kalapalampattu-Alantangal tank ...	Rs. 190
(2) Do. a byewash and seven pot sluices in Thorayur channel. 130	
(3) Repairing and strengthening the banks of Thorayur tank supply channel	1,330
Total ...	1,650

2. The necessity for the above alterations is fully explained in the report accompanying the estimates.

3. The estimate of Rs. 1,330 should be sanctioned under "Maintenance and repairs," which will result in a saving of Rs. (1,460 — 320) = Rs. 1,140 under capital accounts.

ENCLOSURE.

REPORT to accompany an estimate for Repairs and Improvements to Thorayur Old Supply Channel.

The present proposals being only a deviation from the sanctioned estimates, the amount of estimate as sanctioned and as now proposed are compared below :—

Estimates sanctioned.		Estimates now proposed.	
	Rs.		Rs.
Proposed weir * in Alantangal tank ..	710	Constructing a cheap weir in Alantangal tank.	190
Do. supply sluice † in Alantangal tank ..	750	Repairs and improvements to Thorayur old channel	1,330
		Constructing a byewash, &c.	130
Total ..	1,460	Total ..	1,650
Excess Rs. 190			

* Item No. 8 in page 9 of G.O. No. 603 I., dated 11th July 1892.
† Item No. 15 in page 8 of the Government Order quoted above.

In estimates sanctioned in G.O. No. 603 I., dated 11th July 1892, it was proposed to pass water on to Thorayur tank through a sluice (estimate Rs. 750). This has been found unnecessary, and it will suffice to let the necessary supply out through a vent in the weir which will be built on a cheaper design than originally sanctioned.

2. The channel from the old Thorayur Kondam to Kalapalampattu, Puder and Thorayur tanks is stated in the report to require nothing doing to it. It is, however, found that it has numerous large cuts for irrigation and that it requires widening. The present estimate provides for making the necessary section to carry the required supply and for building pipe sluices at the sites of the existing cuts.

As the surplus of Kalapalampattu-Alantungal will be discharged at the same point as the supply for the lower tanks, it becomes necessary to discharge the surplus water across the channel. A dry stone escape will therefore be built to pass off the surplus water to the Kaveripak surplus channel.

(Signed) H. E. CLERK,
Ex. Engr., North Arcot Dn.

ORDER—No. ³⁰⁷/_A I., dated 31st March 1896.

The following estimates are sanctioned in lieu of the provision of Rs. 1,460 made for a weir and supply sluice in Alantungal tank in the classified abstract estimate, printed in Proceedings of Madras Government, No. 603 I., dated 11th July 1892, saving of Rs. 1,140 effected by the present estimates being added to the balance available for unforeseen works of the Palar anicut system, which will then be increased to Rs. 1,191:—

Report to accompany an Estimate
for repairs & Improvements to Thora-
yer old supply Channel. 288

The present proposal, being only a
derivation from the sanctioned Esti-
mates the amount of Estimate as sanc-
tioned and as now proposed are com-
pared below.

Estimates sanctioned		Estimates now proposed	
* Item No 7 in page 9 of G.O. No 603, dated 11-7-92.	Proposed weir in Man- tungal Tank — 710	Consty: a cheap weir in Man-tungal Tank — 190	
Item No 15 in page 9 of the first order quoted above.	Proposed supply sluice in Man-tungal Tank — 750	Repairs & Imp'ts to Thora- yer old Channel — 1330 1320	
		Consty: a byewash — 130	
	Total Rs — 1460	Total Rs — 1650	
		Excess Rs — 190	

In estimates sanctioned in
G.O. No 603 dated 11th July 1892 it was
proposed to pass water on to Thora-
yer Tank through a sluice (Estimate Rs
750). This has been found unneces-
sary and it will suffice to let
the necessary supply out through
a vent in the weir which will
be built on a cheaper design than
originally sanctioned.

The

2 The Channel from the old Thorayur Tank to Kala Palampattu Padari and Thorayur Tank is stated in the report to require nothing doing to it. It is however found that it has numerous large cuts for irrigation and that it requires widening. The present estimate provides for making the necessary section to carry the required supply and for building pipe sluices at the sites of the existing cuts.

As the surplus of Kala Palampattu Alan Tangal will be discharged at the same point as the supply for the lower Tank it becomes necessary to discharge the surplus water across the Channel. A dry stone escape will therefore be built to pass off the surplus water to the Kaveri-
pak surplus Channel.
