GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following paper :—

From A. H. GARRETT, Esq., Executive Engineer in charge I Circle, to the Chief Engineer for Irrigation, dated Waltair, 1st March 1896, No. 1200 G.N.

I have the honour to submit herewith, for sanction, an estimate amounting to Rs. 1,650 for “making up the right flood bank of Bhaguva river in Bramanachayi village,” received from the Executive Engineer, Ganjám division.

2. The freshes which come down the Bhaguva river overflow almost all the lands (about 450 acres) in the village and render them unirrigable, and it is therefore proposed to throw up a flood bank 3 feet above M.F.L. in the Bramanachayi limits, i.e., in continuation of the flood bank thrown up by Atagada estate people as explained in the report accompanying the estimate.

3. The estimate is submitted for sanction of Government as per orders contained in G.O. No. 902 I., dated the 16th November 1894.

ENCLOSURES.

ARZI from POTHAPRAGADA VENCATRAMANIAH, Deputy Tahsildar of Purushottapur, to the Senior Assistant Collector of Ganjám.

This village (Bramanachayi) depends upon the Bhaguva river. The flood embankment of the river has long been out of repair. Near this river, there are lands belonging to Atagada taluk in the north. The river has a strong bund extending as far as the boundary limits of the Atagada taluk. An estimate for its repairs was prepared by the taluk people. Our lands in Bramanachayi outside the limits of the said estate are greatly covered up with sand owing to floods. It is usual that a great deal of sand passes in that river. For want of flood embankment all that sand blows out on wet lands and renders them unfertilizing.

It is therefore requested that a flood embankment similar to that strengthened by the Atagada estate people should be constructed and extended as far as that river flows in Government taluk, i.e., as far as the river joins the Rushikulya leaving the Atagada taluk.

No. 912.

Forwarded.

The construction of a flood embankment is a great desideratum and I strongly support the recommendation of the Deputy Tahsildar.

14th August 1891.

Tahsildar.

No. 310 I., 1ST APRIL 1896.

Report to accompany the estimate for making up the right flood bank of Bhaguva river in Bramanachayi village limits.

Amount of estimate	...	...	...	...	RS.
re is a flood bank to the Bhagava river in the D	...	...	...	...	1,650

There is a flood bank to the Bhaguvu river in the Bramanachayi village limits made by the villagers themselves which only extends to a short length. The freshes which come down the Bhaguvu river overflow almost all the lands (about 450 acres) in the village and render them unirrigable. It is therefore proposed to throw up a flood bank 3 feet above M.F.L. in the Bramanachayi limits, i.e., in continuation of the flood bank thrown up by Atagada estate people. The bank is to have a top width of $4\frac{1}{2}$ feet and side slopes 2 to 1 in front and $1\frac{1}{2}$ to 1 in rear.

This estimate has been prepared at the request of the Senior Assistant Collector—vide enclosed extract of translation of Tahsildar's letter, received with the Senior Assistant Collector's No. 1003 M., dated 2nd February 1892.

Estimate for making
 the right flood bank
 of Bhagura river -
 Ganjam Dist.

x Bramanaachayi

To
 The Senior Assistant Collector
 Ganjam

Arzi from Bothapragada Venkata-
 mania Deputy Tahsildar of Boushottapur

This village depends upon the
 Bhagura river. The flood embank-
 ment of the river has long been out
 of repair. Near this river, there are lands
 belonging to Attagada Salug in the
 North. The river has a strong bend ex-
 tending as far as the boundary limits of
 the Attagada Salug. An estimate for
 its repairs was prepared by the Salug
 people. Our lands in Bramanaachayi
 outside the limits of the said estate
 are greatly covered up with sand owing
 to floods. It is usual that a great
 deal of sand passes in that river.
 For want of flood embankment all
 that sand blows out on wet lands and
