INDEXED.

27/11

Approving the proposals of the Superintending Engineer, III Circle, with regard to the additional establishment required for —, transferring S. A. Jagadisa Aiyar, Assistant Engineer, to the III Circle for charge of the ordinary Anantapur sub-division, and sanctioning the entertainment of certain temporary establishment proposed by the Superintending Engineer.

GOVERNMENT OF MADRAS.
PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ— the following paper:—

From W. B. DEWINTON, Esq., Superintending Engineer, III Circle, Bellary, to the Chief Engineer, Public Works Department, dated Kurnool Canal, 20th November 1896, No. 25 C.

In forwarding herewith copy of letter from the officer in charge of Bellary division with enclosures giving details of the additional establishment he considers necessary for famine relief works, I have the honour to state that I agree, in the main, with his proposals which have already been discussed demi-officially, but would modify them as follows:—

(1) The Anantapur district to be formed into a famine relief sub-division of the Bellary division at once with the following staff:—

Engineer establishment.		Upper Subordinate establishment.		Lower Subordinate establishment.		Office establishment.			Remarks.
No.	Rank.	No.	Rank.	No.	Rank.	Pay.	No.	Rank.	
1	Assistant Engineer.	2	Upper Subordinates.	3	Sub-Overseers.	Rs. 35	1	Clerk	One for Assistant Engineer, one for each Upper Subordinate.
				2	Surveyors ..	30	3	Clerks ..	
							1	Draftsman ..	
							5	Peons ..	Three for Assistant Engineer, one for each Upper Subordinate.
									6

(2) The Assistant Engineer to be Mr. F. Heinig, at present in charge of the Anantapur Sub-division, because he knows the district thoroughly. He should be given the powers of an Executive Engineer and be allowed to deal on his own responsibility with all the operations of the sub-division without reference to the officer in charge of Bellary division, except in the matter of accounts, which should be submitted to the Bellary division office.

(3) Another Assistant Engineer to be appointed at once to the charge of the existing Anantapur Sub-division *vice* Mr. Heinig, as Supervisor S. A. Swaminatha Iyer's transfer to this division has been cancelled.

(4) A famine sub-division to be formed in the Bellary division as soon as relief works are undertaken on a large scale, with staff similar to the one above given for Anantapur famine sub-division, but all the members of it, with the exception of the Assistant Engineer and his two clerks and three peons, to be appointed at once, to work under the orders of the Executive Engineer in the preparation and execution of famine relief estimates.

(5) The remaining staff asked for by the Executive Engineer to be appointed as necessity arises.

2. If these proposals are approved, I beg that the following appointments may be made at once:—

Anantapur Famine Sub-division.

(1) Mr. F. Heinig to be appointed to take charge, with powers of Executive Engineer.

(2) An Assistant Engineer to be appointed in his place for charge of ordinary Anantapur sub-division.

(3) Two upper subordinates to be appointed. (This has already been done.)

(4) Sanction to be given to the appointment of the lower subordinate and office establishment shown in paragraph 1 (1) above.

Bellary Famine Sub-division.

(5) Two upper subordinates to be appointed. (This has already been done.)

(6) Sanction to be given to the appointment of the lower subordinate and office establishment required, viz.:—

3 Sub-Overseers.	1 Draftsman on Rs. 30.
2 Surveyors.	2 Peons on Rs. 6.
2 Clerks on Rs. 20.	

3. A consolidated proposition statement of establishment required for famine relief will be forwarded for the whole circle when all requirements are known.

ENCLOSURE.

From J. F. SOMERSET-EVE, Esq., Executive Engineer, Bellary Division, to the Superintending Engineer, III Circle, Bellary, dated 14th November 1896, No. 6477.

I have the honour to forward my proposals for the increase of establishment which I consider will be necessary owing to the impending famine.

The present division consists of two districts—Bellary and Anantapur—covering an area of 10,000 square miles.

It is quite impracticable to work this as one division with famine works thrown in.

In the last famine it was divided into two divisions, but the result was excessively unsatisfactory. The records were handed over correctly, but owing to want of office-room and other causes they were lost, mislaid and mixed up, that in many cases no information is now available either of the ordinary or famine works executed at that time. If such was the case then, the confusion now would be far worse, if the ordinary works were separated as there are now in course of construction many large buildings in the Anantapur district, for some of which revised estimates are necessary at once, and for others, contractors to be finally settled with. A new officer with a new office would find it almost impossible to do this.

I therefore propose to have the ordinary division as it is, expanding works as much as possible, which will give ample work to the existing staff and to form two new famine division of Bellary and Anantapur as far as executive work is concerned, but subordinate to the Division office as regards accounts. An alternative arrangement would be to form an Anantapur Famine division and an extra sub-division for the Bellary division, but the cost would be nearly the same.

I consider it absolutely necessary for the Anantapur division to be formed and that at once. It is next to impossible that I can give two Collectors the assistance they require and delay must occur in despatch of urgent enquiries as regards Anantapur. The Collector has asked me to start three minor irrigation relief test works, and I have been compelled to state that I can only do two with the present staff and that will considerably hamper other work.

The centralization of the accounts will be a great advantage, I consider, and I think this will have the support of the Examiner. An Assistant Accountant may probably be necessary later on.

As regards officers, I consider Mr. Heinig would be the best Famine officer for the Anantapur division, as he knows the district intimately, and I should require an experienced officer to replace him. Supervisor S. A. Swaminatha Iyer would be most suitable. He was posted to this division on 4th September 1896, but has not yet arrived. I request he may be asked for urgently. As regards Bellary, Mr. Gopala Iyer would be made the Famine Divisional officer, and an upper subordinate could be put in his charge. The Overseer Subramania Aiyar would do very well if Government would sanction a temporary man having charge of a sub-division. I cannot recommend any of the other of my subordinates for that charge.

BACK PAPERS.

FURTHER PAPERS.

Letter from J. F. Tomers Esq., Exe: Engineer
Bellary Division, No 6477 dated 14 November 1896
to the Supty: Engineer, III Circle, Bellary.

I have the honour to forward my proposals for the increase of establishment which I consider will be necessary owing to the impending Famine.

The present division consists of two districts
Bellary and Anantapur covering an area of
10,000 square miles.

It is quite impracticable to work this as one division with Famine works thrown in.

In the last famine it was divided into two divisions, but the result was excessively unsatisfactory. The records were handed over correctly, but owing to want of Office room and other causes they were lost, mislaid and mixed up, that in many cases no information is now available either of the ordinary or famine works executed at that time. If such was the case then, the confusion now would be far worse, if the ordinary works were separated as there are now in course of construction many large buildings in the Anantapur district, for some of which revised estimates are necessary.

necessary at once, and for others, contractors to be finally settled with. A new Officer with a new Office would find it almost impossible to do this.

I therefore propose to have the ordinary division as it is, expanding works as much as possible, which will give ample work to the existing staff and to form two new famine divisions of Bellary and Anantapur as far as executive work is concerned, but subordinate to the Division Office as regards accounts. An alternative arrangement would be to form an Anantapur Famine division and an extra Sub-Division for the Bellary Division, but the cost would be nearly the same.

I consider it absolutely necessary for the Anantapur Division to be formed and that at once. It is next to impossible that I can give two Collectors the assistance they require and delay must occur in despatch of urgent enquiries as regards Anantapur. The collector has asked me to start three minor Irrigation Relief Test works and I have been compelled to state that I can only do two with the present staff and that will considerably hamper other work.

The

The centralization of the accounts will be a great advantage I consider, and I think this will have the support of the Examiners. An assistant Accountant may probably be necessary later on. As regards Officers I consider Mr. Steinig would be the best Famine Officer for the Anantapur Division, as he knows the district intimately, and I should require an experienced Officer to replace him. Supervisor S. A. Sevaminatha Iyer would be most suitable. He was posted to this division on 4th September 1896 but has not yet arrived. I request he may be asked for urgently. As regards Bellary Mr. Gopala Iyer could be made the Famine Divisional Officer, and an upper subordinate could be put in his charge. The Overseer Subramania Iyer would do very well if Government would sanction a Temporary man having charge of a Sub-Division. I cannot recommend any of the other of my subordinates for that charge.
