SUBJECT.

Private jobs — stating that there is no objection ^{to} ~~for~~ the continuance of the present practice of signing the certificates in the estimates for —

S.S. II and
on Nov

H.E. 20/11 224/11.

28 SEP. 1966

For private jobs undertaken in the Bezunda workshops estimates are recorded in the workshop office. The workshop Superintendent frames these estimates and receives them accepted as also deposits to cover the cost. It has been therefore the practice hitherto for the Superintendent to enter a certificate in the schedule of private jobs that a sufficient deposit has been made and that accepted estimates containing the usual percentage are on record. Such certificate countersigned by the Executive Engineer has been hitherto accepted by the Examiner although in a N.B. in page 127 of vol II, chap III of the P.W.D. code it is laid down that the certificates of the Divisional

accountants countersigned by the Executive Engineer, that the rules have been complied with, may be accepted by the Examiner and checked at his test audit.

2. The Examiner now calls attention to this rule and requires the certificate to be given as stated in the N. B. above referred to. He was informed in reply that, as the complete information and records are in the workshop office and not in the Divisional office, without a change of system in the filing of estimates and office copies of workshop accounts (with) the Divisional accountant would be unable to sign the certificate. The Examiner now says sanction of Government should be obtained for continuing the practice hitherto in force. As long as the certificate is countersigned by me, the spirit of the rule is,

I think, observed and if this view is accepted the present practice is not in variance with the rule.

3. Under these circumstances, I have the honor to request that orders may be obtained authorizing the Examiner to allow the present practice to continue.

W.

The Code rule (note at foot of page 127 Code Vol. II) requires the certificate from the Accountant countersigned by the Executive Engineer and this was given until ^{with} the accounts for November 1895, the certificate was signed by the Work-Shop Superintendent and countersigned by the Executive Engineer. I see no objection to the continuance of the present practice.
