Inspection Report

Communicating to the Superintending Engineer, I Circle, with remarks, office-
note from the Examiner submitting an — of the office of the Executive Engineer,
Gódávári Central division.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Account.

READ—the following papers:—

Report of an Inspection of the office of the Executive Engineer, Gódvári Central Division, made by Mr. F. W. EICKE, Examiner of Accounts, in October 1896.

The division was separated from the Gódvári Western division and formed into a separate division in September 1895—*vide* G.O., No. 686 W., dated 22nd March 1895. Mr. W. J. Howley, Executive Engineer, 3rd grade, temporary, in charge of the division, was present at head-quarters during a portion of the inspection. The Divisional Accountant Mr. D. Vankatappiah, 7th grade, joined the Divisional office on 15th January 1896, relieving Mr. R. A. D. Lokaya, Acting Accountant, in place of Mr. A. Balasundaram Pillai (6th grade, temporary), the permanent incumbent. There has been no previous inspection of the office by an Accounts officer or the Superintending Engineer. There are two sub-divisions, Nos. 1 and 2. The former is under the charge of Mr. G. S. Ramiah Avargal, B.A., B.C.E., Assistant Engineer, 3rd grade, and the latter under Mr. Narasimha Row Naidu, Overseer, 1st grade. Both officers have drawing accounts.

2. A memorandum of notes and suggestions on certain points noticed at the inspection but not brought into this report, was left with the Executive Engineer for the information and guidance of that officer and his accountant. The prescribed test-audit was applied to the accounts for the month of February 1896.

3. The rules regarding the record of measurements require to be more carefully attended to in sub-divisions. The books of T. Venkataratnam of the No. 1 sub-division particularly contain a great many corrections—many of them made in an improper manner by conversion of figures, &c. The date of measurement should invariably be clearly and distinctly recorded. Strict compliance with Code, II, I, 31—39, and the instructions on form No. 6 should be insisted upon.

4. The current cheque books in use are kept by the Executive Engineer; the blank books by the head clerk. There should be no difficulty in arranging for. Code, II, I, 87, and note (1) of the instructions inside the cover of the cheque book to be complied with. The certificate of count of cheques should be signed by the disbursing officer in each cheque book as soon as the books are received.

5. The cash book is well and neatly kept by the head clerk. Two instances of entries being interpolated, however, appear to indicate that it is not always posted day by day with perfect accuracy. Strict attention should be paid to Code, II, I, 40, and the instructions on form No. 4. Some delays occur in the submission of the sub-divisional cash extracts and vouchers. Action is being taken by the Divisional office. Attention should be given to Code, II, I, 189 and 191.

6. The balance of stock at end of August 1896 was Rs. 66 in excess of the sanctioned limit of Rs. 1,500. The Executive Engineer has applied for the limit to be increased to Rs. 3,000, and the matter is said to be before Government. The

pricing of the primary stock accounts had not been commenced for September; in consequence of this, the posting of the stock abstract book and the register of works (as regards stock transactions) was delayed. Attention is invited to Code, II, 138. As no *written* agreements are, it is understood, entered into with piece-workers, particular care should be taken by the accountant to compare the rates entered in the bills with those in the estimate.

7. A sum of Rs. 1,473-1-6, cost of uprooting grass planted by renters, has been outstanding since June 1896 in the Miscellaneous Advance Account. The responsibility for the recovery is said to rest with the Collector of the district. The expenditure appears to have been incurred on the authority of the Superintending Engineer. To prevent difficulty and delay in recovery in such cases, it would appear to be advisable to make due provision in the leases on this account in future.

8. No separate schedule of rates has yet been approved by the Superintending Engineer for the division. Early action is needed with reference to Code, I, VII, 8.

9. The rules as to payment of salaries before audit are not strictly observed,—the salaries of the Divisional office for September, October, November 1895, February, March and September 1896 having been paid before despatch of the salary bills for those months to the Examiner. This is forbidden in Code, II, II, 58 (11). The register of bills had not been seen by the Executive Engineer since the formation of the division. It should be seen frequently by the Executive Engineer, who should initial it on each occasion of inspection.

10. With the exception of the points noticed in this report and in the notes left with the Executive Engineer, the work of the office is in a satisfactory state. The accountant understands his business and has a good grip of the office work. He does a good deal of original work himself, and was able to give information first hand. He should attend carefully to the instructions given in this report and in the notes left with the Executive Engineer.

11. The books and accounts of the No. 1 sub-division were inspected. The cash book is kept by the head clerk. The practice of leaving a blank line between each entry should be discontinued, and diagonal lines drawn across the vacant space that may be left on the receipt side. The "head of service" is unnecessarily entered in col. 9. Two interpolations were noticed: this practice should be at once stopped. Corrections in muster rolls are sometimes made by converting the figures: attention is invited to Code, II, I, 56. A long delay occurred in the payment of coolies on voucher No. 3. The coolies were engaged on the muster roll by the Sub-divisional officer ("due to 1896—a remark being made on the muster roll by the Sub-divisional officer ("due to want of funds"). The necessity for engaging the coolies on 26th June 1895 under these circumstances is not clear. The current cheque books were not seen as they had not been brought for inspection. Some of the balances on the back of the old cheque counterfoils had been corrected in an improper manner by converting the figures. The return of stock for the current half-year had not been brought for inspection—it was stated to have been posted up to date. A register of revenue derived from sales of grass on leases should be opened out at once showing the names of different canals, mode of recovery, date due, date recovered, &c. The register of service lables requires to be more neatly and carefully written up.

CHETTIPETT,
22nd October 1896.(Signed) F. W. EICKE,
Inspecting Officer.

Office-note from the Examiner, Public Works Accounts, dated Madras, 25th November 1896, No. 832 B.

Forwarded to Government for information and orders.

The points noticed in the report, particularly those referred to in paragraphs 3 and 11, should have the attention of the Executive Engineer and of the Superintending Engineer.

ORDER—No. 3539 W., dated 10th December 1896.

Communicated to the Superintending Engineer, I Circle, for the information and guidance of the Executive Engineer, Gódavari Central division.

2. The Superintending Engineer should obtain the explanations of the Executive Engineer on the following points, and submit them with a report for the orders of Government:—

Paragraph 3 of Inspection notes.—Want of care in the observance of the rules regarding the record of measurements.

Paragraph 4.—Blank cheque books left in the custody of the head clerk.

Paragraph 5.—Want of accuracy in posting the cash book each day.

Paragraph 6.—Delay in pricing the primary stock accounts.

Paragraph 7.—Delay in the recovery of the cost of uprooting grass planted by renters.

Paragraph 8.—Schedule of rates not yet approved.

Paragraph 9.—(1) Non-observance of the rules relating to payment of salaries before audit, and (2) failure of the Executive Engineer to inspect the register of bills.

Paragraph 11.—(1) Delay in the payment of coolies in No. 1 Sub-division, and (2) improper correction of balances on the back of cheque counterfoils.

3. With reference to paragraph 6, an increase of stock limit to Rs. 3,000 was sanctioned in G.O., No. 936 I., dated 10th November 1896.

BACK PAPERS.

FURTHER PAPERS.

*Report of an Inspection of the office of the Executive Engineer, Godavari Central Division,
made by Mr. F. W. EICKE, Examiner of Accounts, in October 1896.*

The division was separated from the Gódvári Western division and formed into a separate division in September 1895—*vide* G.O., No. 686 W., dated 22nd March 1895. Mr. W. J. Howley, Executive Engineer, 3rd grade, temporary, in charge of the division, was present at head-quarters during a portion of the inspection. The Divisional Accountant Mr. D. Vankatappiah, 7th grade, joined the Divisional office on 15th January 1896, relieving Mr. R. A. D. Lokaya, Acting Accountant, in place of Mr. A. Balasundaram Pillai (6th grade, temporary), the permanent incumbent. There has been no previous inspection of the office by an Accounts officer or the Superintending Engineer. There are two sub-divisions, Nos. 1 and 2. The former is under the charge of Mr. G. S. Ramiah Avargal, B.A., B.C.E., Assistant Engineer, 3rd grade, and the latter under Mr. Narasimha Row Naidu, Overseer, 1st grade. Both officers have drawing accounts.

2. A memorandum of notes and suggestions on certain points noticed at the inspection but not brought into this report, was left with the Executive Engineer for the information and guidance of that officer and his accountant. The prescribed test-audit was applied to the accounts for the month of February 1896.

3. The rules regarding the record of measurements require to be more carefully attended to in sub-divisions. The books of T. Venkataratnam of the No. 1 sub-division particularly contain a great many corrections—many of them made in an improper manner by conversion of figures, &c. The date of measurement should invariably be clearly and distinctly recorded. Strict compliance with Code, II, I, 31—39, and the instructions on form No. 6 should be insisted upon.

4. The current cheque books in use are kept by the Executive Engineer; the blank books by the head clerk. There should be no difficulty in arranging for Code, II, I, 87, and note (1) of the instructions inside the cover of the cheque book to be complied with. The certificate of count of cheques should be signed by the disbursing officer in each cheque book as soon as the books are received.

5. The cash book is well and neatly kept by the head clerk. Two instances of entries being interpolated, however, appear to indicate that it is not always posted day by day with perfect accuracy. Strict attention should be paid to Code, II, I, 40, and the instructions on form No. 4. Some delays occur in the submission of the sub-divisional cash extracts and vouchers. Action is being taken by the Divisional office. Attention should be given to Code, II, I, 189 and 191.

6. The balance of stock at end of August 1896 was Rs. 66 in excess of the sanctioned limit of Rs. 1,500. The Executive Engineer has applied for the limit to be increased to Rs. 3,000, and the matter is said to be before Government. The pricing of the primary stock accounts had not been commenced for September; in consequence of this, the posting of the stock abstract book and the register of works (as regards stock transactions) was delayed. Attention is invited to Code, II, II, 138. As no *written* agreements are, it is understood, entered into with piece-workers, particular care should be taken by the accountant to compare the rates entered in the bills with those in the estimate.

7. A sum of Rs. 1,473-1-6, cost of uprooting grass planted by renters, has been outstanding since June 1896 in the Miscellaneous Advance Account. The responsibility for the recovery is said to rest with the Collector of the district. The expenditure appears to have been incurred on the authority of the Superintending Engineer. To prevent difficulty and delay in recovery in such cases, it would appear to be advisable to make due provision in the leases on this account in future.

8. No separate schedule of rates has yet been approved by the Superintending Engineer for the division. Early action is needed with reference to Code, I, VII, 8.

9. The rules as to payment of salaries before audit are not strictly observed,—the salaries of the Divisional office for September, October, November 1895, February, March and September 1896 having been paid before despatch of the salary bills for those months to the Examiner. This is forbidden in Code, II, II, 58 (11). The register of bills had not been seen by the Executive Engineer since the formation of the division. It should be seen frequently by the Executive Engineer, who should initial it on each occasion of inspection.

10. With the exception of the points noticed in this report and in the notes left with the Executive Engineer, the work of the office is in a satisfactory state. The accountant understands his business and has a good grip of the office work. He does a good deal of original work himself, and was able to give information first hand. He should attend carefully to the instructions given in this report and in the notes left with the Executive Engineer.

11. The books and accounts of the No. 1 sub-division were inspected. The cash book is kept by the head clerk. The practice of leaving a blank line between each entry should be discontinued, and diagonal lines drawn across the vacant space that may be left on the receipt side. The "head of service" is unnecessarily entered in col. 9. Two interpolations were noticed: this practice should be at once stopped. Corrections in muster rolls are sometimes made by converting the figures: attention is invited to Code, II, I, 56. A long delay occurred in the payment of coolies on voucher No. 3. The coolies were engaged on 26th June 1895, but not paid till 27th January 1896—a remark being made on the muster roll by the Sub-divisional officer ("due to want of funds"). The necessity for engaging the coolies on 26th June 1895 under these circumstances is not clear. The current cheque books were not seen as they had not been brought for inspection. Some of the balances on the back of the old cheque counterfoils had been corrected in an improper manner by converting the figures. The return of stock for the current half-year had not been brought for inspection—it was stated to have been posted up to date. GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

READ—the following papers :—

From A. H. GARRETT, Esq., Superintending Engineer, I Circle, to the Chief Engineer, Public Works Department, dated Dowlaishwaram, 12th February 1895, No. 2102 G.D.

I have the honour to submit the proposition statement promised in my No. 2045 G.D., dated 31st January 1895.

- 1 Executive Engineer.
- 2 Assistant Engineers.
- 7 Upper Subordinates.

2. The total number of Engineers and Upper Subordinates now employed in the Western delta division is fifteen, but the scale originally sanctioned is as given in the margin.

3. When the Central delta is taken away, the Western delta division will consist of three sub-divisions and it will be observed that the staff proposed differs very slightly from that originally sanctioned for the Western division as at present constituted.

4. The new Central delta division will have two sub-divisions and the staff allowed is considered ample both by Mr. Paul and myself. To provide this staff only two more Upper Subordinates are required.

5. The accompanying statistics are of use in enabling some idea to be formed of the relative importance of the two divisions :—

	Western delta.	Central delta.
Ultimate irrigated area	350,000	130,000
Mileage of navigable canals	219	119
Distributaries	943	429
Establishment—number of service books maintained.	253	91
	RS.	RS.
Expenditure in 1893-94	1,78,293	98,160
Budget grants, 1894-95	1,73,762	78,669

6. From this statement it may appear that the Central delta division will be provided for on a more liberal scale than the Western delta division, but it is anticipated that with a proper establishment there will be a lot of new works and a considerably increased expenditure in the Central delta division.

7. A proposition statement showing the additional clerical establishment required for the formation of a third division in the Gódávāri delta is also submitted, and in drawing up this statement the Western delta has been regarded as a 1st-class and the Central delta as a second-class division though in both cases it has been considered advisable to provide establishments on a slightly increased scale.

8. From the proposition statements it will be seen that the extra clerical establishment required, due to the formation of a new division, will cost Rs. 300 per month, and the cost of two additional Upper Subordinates, together with the difference between

the pay of an Assistant Engineer, 1st grade, and an Executive Engineer, 3rd grade, amounts to about Rs. 430 per month. The total extra cost per month would thus be about Rs. 730 * or about Rs. 9,000 per annum.

* Exclusive of the pay of accountant and office contingencies.

Office-note from the Examiner, Public Works Accounts, dated 6th March 1895, No. 797 D./E.

ORDER—dated 22nd March 1895, No. 686 W., Public Works.

His Excellency the Governor in Council observes that since the issue of G.O., No. 3129 W., dated 7th December 1894, the executive staff of the divisions of the Gódávári district have been so increased that it will not now be very difficult to provide the further strength required for the formation of a new division. The proposal to divide the Gódávári Western division into two separate divisions as follows is accordingly sanctioned:—

(1) Gódávári Western division—

Sub-divisions—

- (1) Eastern.
- (2) Western.
- (3) Tank and Embankment.

(2) Gódávári Central division—

Sub-divisions—

- No. 1.
- „ 2.

2. The existing as compared with the proposed staff is shown below:—

	Present.	Proposed.
Executive Engineer	1	2
Assistant Engineers	3	2
Upper Subordinates above the grade of overseer	5	5
Overseers	3	5
Temporary Upper Subordinates	3	3

3. It will thus be seen that the only additions required are one Executive Engineer and two overseers, while one Assistant Engineer will be set free. Proposals for such postings as require the sanction of Government will be submitted by the Chief Engineer.

4. The proposition statement submitted by the Superintending Engineer has been recast; establishments for detached officers and overseers being of a fluctuating character have been eliminated, and the net increase is shown to be Rs. 76-8-0 per mensem. The statement as thus revised is sanctioned, and the sanction registered as Provincial No. 77 W. of 1894-95 and classified as Establishment, Permanent.

5. The Superintending Engineer will submit a map showing clearly the territorial limits of the new charges.

READ—the following paper :—

From A. H. GARRETT, Esq., Superintending Engineer, I Circle, to the
Chief Engineer for Irrigation, dated Dowlaishweram, 8th November 1895,
No. 1810 G.D.

I have the honour to request that you will be good enough to obtain sanction of
Government to maintain a permanent reserve stock of Rs. 1,500 in the Gódávári
Central division under paragraph 125, chapter II, Volume II, of the Public Works
Code.

2. The stock will consist mainly of building stone, revetment stone and broken
stone (for concrete), together with some lime, &c.

3. It is especially necessary to keep a sufficient reserve in this division, owing to
its inaccessibility for fully laden boats during nearly the whole working season, and
often for any kind of boat during the latter part of the working season.

4. The limit now proposed (Rs. 1,500) is the same as that sanctioned in G.O.
No. 432 I., dated 22nd July 1887, for the late Gódávári Central division abolished in
March 1890.

ORDER—No. 1029 I., dated 27th November 1895.

The maintenance in the Gódávári Central division of a reserve stock not exceed-
ing Rs. 1,500 in value is approved.

No. 936 I., 10TH NOVEMBER 1896.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following paper :—

From W. J. HOWLEY, Esq., Executive Engineer, Gódávári Central Division, to the Superintending Engineer, I Circle, dated Madupalli, 8th October 1896, No. 195 S.

I have the honour to point out that the river has already fallen exceedingly low this year, and I fear that even with continual dredging it will be impossible for laden boats to reach Bobberlanka after December.

2. As a good deal of laterite and revetment stone will be required for river sets during the working season, I have the honour to request that, under the circumstances, my sanctioned limit of stock may be raised from Rs. 1,500 to Rs. 3,000.

3. It is not at all improbable that Bobberlanka will be inaccessible for fully laden boats from December next till July 1897.

No. 1495 G.D.

Copy submitted to the Chief Engineer for Irrigation, with a request that the limit of reserve stock sanctioned in G.O., No. 1029 I., dated 27th November 1895, may be raised from Rs. 1,500 to Rs. 3,000 under the circumstances stated by the Executive Engineer in the foregoing letter.

14th October 1896.

(Signed) J. C. LARMINIE,
Superintending Engineer, I Circle.

ORDER—No. 936 I., dated 10th November 1896.

The maintenance, in the Gódávári Central division, of a reserve stock not exceeding Rs. 3,000 in value, is approved.

(True Extract.)

(Signed) W. HUGHES,
Joint Secy. to Government,
Irrigation Branch.

To the Chief Engineer for Irrigation.
„ Superintending Engineer, I Circle.
„ Examiner, Public Works Accounts.
