No. 354 I., 22nd April 1896.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

Read—the following paper:—

From S. D. PEARS, Esq., Superintendent of Works, No. I Periyár Division, to the Chief Engineer for Irrigation, dated Periyár, 19th March 1896, No. 229 C.E.

I have the honour to enclose an Account sale showing the total loss on the several articles of stock (other than timber) and to request that sanction of Government may be obtained to the amount being charged off to Main Dam contingencies.

2. Some of the articles for which it was supposed that use can be found elsewhere, have been sent to the Public Works Stores at reduced rates.

3. In considering the loss shown it has to be remembered—first, that the book values given include cost of carriage to Periyár; second, that in selling the stock, not only has the cost of carriage *to* Periyár, but also that *from* Periyár to the nearest markets,—Madura and Trichinopoly,—to be deducted in order to arrive at the actual selling value of any article; third, that the stock consisted of remnants much deteriorated by long keeping. The total loss is therefore heavier than would be the case near a market or with fresh stock.

4. As only a portion of timber stock has been sold, it is not possible to estimate the loss (if any) under that head, until the remainder is sold and the account of logs handed over to Travancore Sirkar is made up.

Enclosure.

Account sale for the month of February 1896, No. I Periyár Division.

NOTES.

Reference to P. W. D. Code.

Chapter X, para. 103.

1. This form will be used for all sales of stock or tools and plant, whether by auction or other agency, but materials issued to a contractor for works under execution by him, should not find a place in this document. In the case of private sales, no deduction will be made on account of commission, nor will the auctioneer's receipt be filled up.

2. In the case of the sale of tools and plant the columns headed, "Rate," "Book value," and "Loss," will be left blank.

3. When stock is sold at a loss, and the executive engineer has not been specially empowered to write off such losses, the circumstance should be reported to the superintending engineer for orders; in such report it should always be stated whether the value of the remaining articles in stock can be raised, without exceeding the proper market value of such articles, and whether there is a probability of these being used for works at the enhanced rates. The description and the book value of the articles, the rates of which it is proposed to raise, the present rate and the proposed increase should be clearly noted.

4. If the stock, the sale of which has resulted in a loss, was purchased for specific works, the proper course would be to write off the loss to debit of the works concerned, and the practicability or otherwise of doing this should be noticed when reporting on the loss.

Executive Engineer.

PUBLIC WORKS DEPARTMENT.

No. ~~227~~ 229 C.E.

Office of the Superintendent of Works,
No. 1. Periyar Division.

Station Periar dated 19th March 1896.

From, S. D. Pears Esqre
Superintendent of Works,
No. I, Periyar Division,
PERIYAR.

To,
THE Chief Engineer.
for Irrigation
Madras.

Reg

Enclosures.

Sir,

I have the honor to enclose an account Sale Showing the total loss on the several articles of stock (other than timber) and to request that sanction of Government may be obtained to the amount being charged off to Main Dam contingencies.

2. Some of the articles for which it was supposed that use can be found elsewhere, have been sent to the P.W. Stores at reduced rates.

3. In considering the loss shown it has to be remembered 1st. that the book values given include cost of carriage to Periar, 2nd. that in selling the stock not only has the cost of carriage to Periar but also that from Periar to the nearest markets, Madura and

P. W. CURRENT No. 3225

and Trichenopoly, to be deducted in order to arrive at the actual selling value of any article, 3rd that the stock consisted of remnants much deteriorated by long keeping. The total loss is therefore heavier than would be the case near a market or with fresh stock.

Enclo 1
[illegible]: 31.3.96

4. As only a portion of timber stock has been sold, it is not possible to estimate the loss (if any) under that head until the remainder is sold and the account of logs handed over to Travancore Sirkar is made up.

I have the honor to be
Sir
your most obt Servant
S. D. Pears
Supdt of Works
Asst Periar Divn

CHIEF ENGINEER
FOR IRRIGATION.
