

Copy of letter from the Examiner, P.W. Accounts, Madras, to the
Accountant General, P.W. Department, No. 4014 A, dated 16th. November 1895

With reference to Government of India letter No. 434 B. of
31st. October 1889, I have the honour to inquire whether, in arriving
at the capital cost of a residence proposed to be purchased, or con-
structed for the occupation of officers holding the appointment of
Executive Engineers (of which there are now two classes viz those of
the Imperial Scale whose salaries range from Rs. 700 to Rs. 1000 or
those on the Provincial scale on salaries from Rs. 475 to Rs. 650) the
centage laid down in code volume I. X. 17(I) should be calculated on
the average salary

- (1) of purely Provincial Executive Engineers ($\frac{650 + 475}{2}$)
- (2) of purely Imperial Executive Engineers ($\frac{1000 + 700}{2}$) or
- (3) of Executive Engineers 1st. Grade on the Imperial Scale and Ex-
ecutive Engineer 3rd. Grade on Provincial scale ($\frac{1000 + 475}{2}$)

2. I am of opinion that under the spirit of the ruling in the
Government of India letter above quoted, the calculation should be
based as in (3) above. In checking the sanction recently given for
the purchase of a house at Tanjore as a residence of the Executive
Engineer of that Division I based the calculation accordingly but as
I am doubtful whether this is correct I solicit the favour of a
ruling on the subject. The Local Government consider that in prac-
tice so important a division will always be held by an Engineer on
the Imperial Establishment.

on a consideration of the pay of the officers who will usually occupy the house, and this Government is of opinion that in the case of important divisions such as Bangalore, (which is mentioned in the Examiner's letter) which are never likely to be placed in charge of officers of the Provincial establishment the average should be struck in the pay of Executive Engineers on the Imperial scale. On the other hand when a division is, from the nature of the charge, as likely to be held by a Provincial Service Officer, as one of the Imperial, the average should be taken in the pay of Executive Engineer 1st grade Imperial & 3rd grade Provincial. and to add that this Govt considers that the question as to how the average should be taken should be left to discretion.

method of calculating "average pay" in various cases was considered for 2.2.96
