With regard to the collector's Bungalow I have read through his correspondence and sent him up one or two pencil plans. At last I have satisfied him and sent the plans as far as they have gone up in pencil. The seats are 10 feet by one inch.

I have only drawn out the ground plan and the first story. There should be an upper storey exactly similar to the first floor but having no verandahs. The collector is perfectly satisfied with it, & I know that it will make him comfortable. The watermans & sweepers staircases I have not shown. They can easily be put in at the back. Wooden staircases will do.

Elevations I have not shown; but elevations can easily be made which will have as good an architectural effect as it, money will allow. The collector

particularly desires the staircase in the middle of his house, and likes the three floors, ground floor, first storey and upper storey. It will make his house a little different from the others and I desire especially to avoid a standard plan monotony.

With regard to out houses I have found out his entire views. A kitchen in rear with larder attached connected with the master's room by a covered passage. A block of building consisting of four stalls for horses, a large coach house, a grain boiling shed and a tank godown with pukka floor.

Another block of six servants' houses. If this design has the approval of Government & I can be allowed sufficient draughtsmen I will prepare it in my own office and by corresponding with the Collector from time to time I can get

get it exactly to suit him.

No. 1259

Office of the Consulting Architect to Govt.,
Chepauk, Madras,
1st February 1896.

From

Henry Irwin, Esq., C.I.E.,

The Consulting Architect

to the Government of Madras,

To

The Chief Engineer

Public Works Department

Sir,

3 Enclosures.

With reference to G. O. No. 2547W dated the 8th November 1895, I have the honour to report that on the 11th November 1895 two designs for residences viz: that prepared for the proposed wardens quarters of the Victoria Students Hostel, is cost about 26000 Rs with out offices; and the plan sanctioned for the Vice Principal quarters Teachers College is cost Rs 9000 were sent to the Executive Engineer Madras Division, that they may be shown to the officers concerned and returned to this office with any modifications suggested to work within the cost given in Chief Engineers note printed with G. O. No. 767 Public dated 12th September 1895.

2.

The plans were returned with letter

065.1
1193/56

N^o 1299 dated 25 January 1896 from the Executive Engineer with modified sketch plans for the several residences, but from the accommodations required as shown in the sketch plans, the building I consider will cost above the limits fixed.

3 To deal with the collectors residence first. I submit the plan for the wardens residence, as well as the sketch furnished by the Executive Engineer Madras Division and an extract from his letter. It will be seen that a three storied house is required and considering the area of accommodation provided, I consider that such a building according to Madras rates, will cost, with out-offices & Roads, over 30000 Rs. However it may be desirable to arrange the accommodation in accordance with the wishes of the officers to occupy them, the size of the building should be restricted so as to come within the limit of cost fixed. For approximate purposes this may easily be calculated from the cubic contents of the building; from the sketch plan, taking the building all above ground level as a solid and the total result in cubic feet multiplied by a "unit of cost" which I presume will amount to about 3 annas per cubic foot for the Residence, and $2\frac{1}{2}$ annas per cubic foot for out-buildings.

I request that you will kindly direct, a sketch to be furnished that will bring the cost within Rs 20000. This would save a deal of labour in this office in drawing plans & setting them aside when they are found too costly.

I have the honour to be
Sir

Your most obedient servant
