From A. G. CARDEW, Esq., M.A., Inspector-General of Prisons, to the Chief Secretary to Government, dated Párvatipuram, 1st January 1896, No. 15 C.

No. 89, Judicial.

FORT ST. GEORGE,
15th January 1896.

Telegram from the Executive Engineer, Gódávári Eastern Division, dated 6th February 1896.

The estimate, amounting to Rs. 3,140, for providing masonry walls for the passage between the outer and inner circles of the Rajahmundry Central Jail, is sanctioned.

3. The existing grant for the work is Rs. 913. The Superintending Engineer will apply by wire for such additional allotment as may be necessary in the current official year.

(True Extract.)

To the Superintending Engineer, I Circle, with four enclosures.

Market-rate
for similar
accommodation

Quarto.

Statement to accompany application for induction of trust of inspection and abatement under P.W. Code Volume I Chapter X para 28, Note III.

The sub division officers at Gaya report that the accommodation in this building is hardly enough for more than one person and finding rent according to rule is prohibitive the rent for similar building in the place. The S.D.O. states that he could get a house close by for rent with three times the amount of accommodation.

Submitted to the Superintending Engineer 4th mile for favor of obtaining the
 sanction of Government to the reduced rate of rent under Code Volume I
 Chapter X para 28 note III d.

Letter No. 89

Dated 15. January 1896

From the Judicial Department

NOTE BY TECHNICAL SECTION.

Name of work Constructing a masonry

Compound wall to the Rajahmundry
Central Jail.

Amount of Estimate Rs 3,140

The plan & estimate under
review provide for constructing
a masonry wall on either side
of the road leading to the central
tower of Rajahmundry jail in
line of the existing wooden pas-
sage for a length of about
830 feet.

On account of the slope of the ground
the wall will be built in steps
with pilasters built 9.44" &
part 2 feet wide & projecting
3 inches on either side of the
wall, as shown on plan.

The nature of soil has not
been mentioned.

The foundations will be laid
generally to a depth of 2'3" &
the superstructure walls built
of random rubble in cement
to a height of 8'6" & part
with similar masonry on

sides. The top of the wall will be rounded off & plastered smooth. The ratios are fair.

The plan & estimate have been sanctioned by the D.C. of Prisons & approved in the Judicial Dept.

The D.C. in sanctioning the plan has remarked that the inner sides of walls should be made smooth & that the buttresses should only be on the outer side of the wall. The estimate provides for painting the inner surface of wall & buttress projections on both sides of 3".

This should be attended to. The S.E. may be asked to make the necessary deviation.

To be smooth plaster.
