JUNE.

Tangadencha Tank

Government of India letter requesting that the estimate for raising the banks of, and storing water in —, Kurnool division, may be reconsidered with reference to the necessity for constructing certain lock, communicated to the Chief Engineer for Irrigation with remarks, and the Superintending Engineer, III Circle, directed to, as far as possible, postpone the execution of such work as may be required solely for navigation purposes.

GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.

Read—the following paper :—

From N. F. MACKENZIE, Esq., Under Secretary to the Government of India, Public Works Department (Civil Works—Irrigation), to the Secretary to the Government of Madras, Public Works Department, dated Simla, 1st May 1897, No. 129 I.

I am directed to acknowledge the receipt of the Proceedings of the Government of Madras, No. 30 I., dated the 8th January 1897 (copy forwarded for the information of the Government of India under your endorsement, No. 31 I. of the same date), containing the sanction of the Local Government to an estimate, amounting to rupees 86,000, for raising the banks of, and storing water in the Tangadencha tank, the work to be executed, when required, as a famine-relief work, chargeable to 43. Minor Works and Navigation—Kurnool-Cuddapah Canal—Open Capital Account.

2. In reply, I am to say that it is observed that the estimate includes provision for the construction of a lock and head sluices. The sluices will be required, but in paragraphs 26 and 27 of his note on a tour of inspection in the Madras Presidency during December 1896 (a copy of which was forwarded to the Government of Madras with Public Works Department letter, No. 128 I., dated the 1st May 1897), the Inspector-General of Irrigation has recommended a reconsideration of the question whether navigation on the Kurnool-Cuddapah canal should not be definitely abandoned; even if this be not decided on, it should be considered whether navigation might not be abandoned above Nandyal and, in that case, the lock would not be required. I am, therefore, to request that the estimate in question may be reconsidered with reference to the necessity for constructing the lock.

3. I am further to point out that as the cost of working and maintenance of all works connected with this canal has to be provided from Imperial funds, the rules in Public Works Department Code, Volume II, Chapter V, paragraph 35-V(*b*), apply to this estimate, the amount of which is, therefore, as it stands at present, beyond the powers of sanction of the Madras Government.

Order—No. 563 I., dated 17th June 1897.

Communicated to the Chief Engineer for Irrigation in continuation of G.O., No. 550 I., dated 14th June 1897.

2. The Superintending Engineer, III Circle, has already been asked by the Chief Engineer for Irrigation to report on the question of navigation on the Kurnool-Cuddapah canal raised by the Inspector-General of Irrigation, and on the receipt of the Superintending Engineer's report, the necessity for constructing the lock will be reconsidered with reference to the request contained in Government of India letter read above. In the meantime the Superintending Engineer, III Circle, should, as far as possible, postpone the execution of such work as may be required solely for navigation purposes.

To

The Secretary to the Government of Madras,
Public Works Department.

Simla, the 1st May 1897.

Sir,

I am directed to acknowledge the receipt of the Proceedings of the Government of Madras, No.30 I., dated the 8th January 1897,(copy forwarded for the information of the Government of India under your endorsement No.31 I. of the same date) containing the sanction of the Local Government to an estimate, amounting to Rs.86,000, for raising the banks of, and storing water in the Tangadencha tank, the work to be executed, when required, as a famine relief work, chargeable to 43 Minor Works and Navigation-Karnul Cuddapah Canal-open Capital Account.

2. In reply, I am to say that it is observed that the estimate includes provision for the construction of a lock and head sluices. The sluices will be required, but in paragraphs 26+ and 27+ of his note on a tour of inspection in the Madras Presidency during December 1896 (a copy of which was forwarded to the Government of Madras with Public Works Department letter No.128 I. dated the 1st May 1897) the Inspector General of Irrigation has recommended a re-consideration
