GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following papers :—

Proceedings of the Board of Revenue (Revenue Settlement, Land Records and Agriculture), Mis. No. 3518, dated 18th May 1897.

Read—the following letter from the Collector of Bellary, dated 2nd May 1897, Ref. on C. No. 1101 :—

In forwarding herewith estimates for Rs. 6,550 prepared by the Public Works Department for restoring the Gudikallu tank in Adóni taluk, I have the honour to request that sanction of Government may be obtained for carrying out the work as a famine-relief work. The repair of the tank is not intended to provide work for labourers in Adóni town as stated by the Superintending Engineer in his letter, No. 382, dated 17th April 1897, for it is near Yemmiganúru. At present other works are available in that neighbourhood and this will be undertaken only if necessity arises.

ENCLOSURE.

REPORT to accompany the estimate for improvements to Gudikallu minor tank, Adóni Taluk.

RS.
Estimate 6,800

The catchment area of the tank is about 7½ square miles (*vide* extract from the ordnance map enclosed), which can be taken to irrigate 150 acres at the rate of 20 acres per square mile of catchment, which is the duty usually assumed in these parts.

The 150 acres will require a storage of about 30 millions, while the capacity of the tank at the F.T.L. proposed is about 2,000 × 4,000 × 4, or 32 millions of cubic feet. Compensation for land likely to be submerged is not much, it being only Rs. 950.

Bund will be raised to 4′ above M.W.L. top width of 6′ and side slopes 1½ to 1 in front and 2 to 1 in rear; revetment will be 1 foot above M.W.L. This work will be taken up as a famine work to employ the Adóni town coolies.

(Signed) H. E. CLERK,
Executive Engineer.

6th April 1897.

Endorsement thereon from the Chief Engineer for Irrigation, dated 2nd May 1897, Ref. No. 162 M.

Forwarded.

2. The amount of the estimate has been increased in this office from Rs. 6,550 to Rs. 6,800 owing to error found in the calculation for earthwork.

3. It is noted that the land compensation and masonry works have been only roughly estimated. The former item especially requires to be carefully looked into before the work is put in hand. On the understanding that the provision for these items are fairly correct, the estimate as modified may be sanctioned for execution if absolutely required for relief purposes.

Resolution—Mis. No. 3518, dated 18th May 1897.

Submitted to Government with the request that the estimates, as revised by the Chief Engineer, amounting to Rs. 6,800, may be sanctioned for execution as relief works, if necessity arises.
